BEA 08-11

STATE PERSONAL INCOME 2007

U.S. personal income grew 6.2 percent in 2007, down from 6.7 percent in 2006, according to preliminary estimates released today by the U.S. Bureau of Economic Analysis. On average, personal income has grown 6.2 percent for the last four years. Inflation, as measured by the national price index for personal consumption expenditures, slowed to 2.6 percent in 2007 down from 2.9 percent in 2006.

Regional growth rates converged in 2007 with slowdowns in the regions that had grown fastest in 2006 and accelerations in the New England and Plains regions which had below average growth in 2006. For the fourth consecutive year, the Southwest region enjoyed the fastest growth of the eight BEA regions (7.5 percent, down from 8.5 percent)

and the Great Lakes region saw the slowest growth (4.8 percent in both years). The contrast between the two regions reflects a mining boom in the Southwest with ripple effects on other industries versus general sluggishness across most industries in the Great Lakes.

Nationally, professional services, health care, state and local government, and finance contributed the most to personal income growth in both 2006 and 2007. The construction industry contributed almost nothing in 2007 after contributing nearly a half percentage point to growth in each year from 2004 to 2006. Real estate earnings declined 2.0 percent in 2007, the only industry to register a decline nationally. But because real estate is relatively small, it reduced personal income growth by less than one-tenth of a percentage point.

For the first time since 2002, state unemployment insurance transfer receipts rose. For the U.S., the 7 percent rise last year, however, was substantially less than the 68 percent rise in 2002. State unemployment insurance transfer receipts rose in all but eight states. Some of the largest increases were in Florida (38 percent), Nevada (37 percent), and Arizona (32 percent), states with the highest homeowner vacancy rates, some of the highest residential mortgage foreclosure rates, and some of the largest construction slowdowns in the nation.

Construction Earnings' Contribution to Percent Change in Personal Income

State	(percentage points)		
	2006	2007	Change
Arizona	1.0	-0.4	-1.4
Florida	0.6	-0.3	-0.9
Nevada	1.0	0.1	-0.9

Source: U.S. Bureau of Economic Analysis

Louisiana grew 10.5 percent in 2007, down from 20.6 percent in 2006. These growth rates are substantially higher than any other state's. The rental income component of Louisiana's personal income was boosted in 2007 by \$5.4 billion of Road Home subsidies from the U.S. Department of Housing and Urban Development (HUD). The subsidies are to persons whose homes had been destroyed or damaged by Hurricane Katrina. Mississippi, whose Homeowners' Assistance Program was funded \$1.5 billion by HUD, grew 7.4 percent in 2007 up from 6.0 percent in 2006.

Per capita income. U.S. per capita income grew 5.2 percent in 2007, down from 5.6 percent in 2006, but equal to the average of the last four years (2004-07). Louisiana's per capita income was up 9.2 percent or \$2,935. Much of the gain in Louisiana is accounted for by the Road Home subsidies which averaged nearly \$1,250 per Louisiana resident. In Mississippi, housing subsidies added \$530 to per capita income.

States with the highest and lowest per capita income growth rates 2006-2007

Rank	State	Growth rate	Rank	State	Growth rate
1	Louisiana	9.2	41	Idaho	4.3

Connecticut led the nation with a per capita income of \$54,117, a level 40 percent above the national average. Mississippi had the lowest per capita income of all states, \$28,845, an amount 25 percent below the national average. The top ten and bottom ten states are the same in both 2006 and 2007.

Source: U.S. Bureau of Economic Analysis

Fourth quarter personal income.¹ U.S. personal income grew 1.0 percent in the fourth quarter of 2007 keeping pace with the quarter's 1.0 percent rise in the price index for personal consumption expenditures. The absence of real personal income growth in the fourth quarter contrasts with the third quarter when personal income growth outpaced price increases by 0.9 percentage point and matches the lack of real growth in the second quarter.

State personal income growth rates in 2007Q4 ranged from 1.4 percent in South Dakota to 0.6 percent in Tennessee, an unusually tight spread of less than one percentage point. Personal income growth was less than the 1.0 percent national inflation rate in 17 states and greater than 1.0 percent in 19 states in the fourth quarter.

NOTE.—Quarterly estimates are expressed at seasonally adjusted annual rates, unless otherwise specified. Quarter-to-quarter dollar changes are differences between published estimates. Quarter-to-quarter percent changes are calculated from unrounded data and are not annualized.

Definitions

Personal income is the income received by all persons from all sources. Personal income is the sum of net earnings by place of residence, rental income of persons, personal dividend income, personal interest income, and personal current transfer receipts. **Net earnings** is earnings by place of work (the sum of wage and salary disbursements (payrolls), supplements to wages and salaries, and proprietors' income) less contributions for government social insurance, plus an adjustment to convert earnings by place of work to a place-of-residence basis. Personal income is measured before the deduction of personal income taxes and other personal taxes and is reported in current dollars (no adjustment is made for price changes).

The estimate of personal income in the United States is derived as the sum of the state estimates; it differs from the estimate of personal income in the national income and product accounts (NIPAs) because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data.

BEA groups all 50 states and the District of Columbia into eight distinct regions for purposes of data collecting and analyses: **New England** (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont); **Mideast** (Delaware, District of Columbia, Maryland, New Jersey, New York, and Pennsylvania); **Great Lakes** (Illinois, Indiana, Michigan, Ohio, and Wisconsin); **Plains** (Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota); **Southeast** (Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia); **Southwest** (Arizona, New Mexico, Oklahoma, and Texas); **Rocky Mountain** (Colorado, Idaho, Montana, Utah, and Wyoming); and **Far West** (Alaska, California, Hawaii, Nevada, Oregon, and Washington).

BEA's national, international, regional, and industry estimates; the *Survey of Current Business*; and BEA news releases are available without charge on BEA's Web site at www.bea.gov. By visiting the site, you can also subscribe to receive free e-mail summaries of BEA releases and announcements.

* * *

Next state personal income release – June 19, 2008, at 8:30 A.M. ET for state personal income, first quarter 2008.

1. Net earnings is earnings by place of work—the sum of wage and salary disbursements, supplements to wages and salaries, and proprietors' income—less contributions for government social insurance plus an adjustment to convert earnings by place of work to a place-of-residence basis.

Note: Estimates may not add to totals because of rounding.

Source: U.S. Bureau of Economic Analysis

Table 3. Contributions to Percent Change in Personal Income, by State and Region, 2006-2007/1

[Percentage points, seasonally adjusted]

	Percent change in personal income	Net earnings						Dividends, interest, and rent	Personal current transfer receipts		
		Earnings by place of work			Proprietors' income	Contributions for government social insurance	Residence adjustment		Excluding state unemployment insurance	State unemployment insurance	
		Wage and salary disbursements	Employee pension and insurance funds	Government social insurance

1. Earnings by place of work is the sum of wage and salary disbursements (payrolls), supplements to wages and salaries, and proprietors' income.

2. "Other" consists of the wage and salary disbursements to U.S. residents employed by international organizations and foreign embassies and consulates in the U.S.

3. Data are suppressed to avoid disclosure of confidential information.

Source: U.S. Bureau of Economic Analysis

Table 4. Contributions to Percent Change in Personal Income by Place of Work, by State and Region, 2006-2007 (continued)

1. Net earnings is earnings by place of work—the sum of wage and salary disbursements, supplements to wages and salaries, and proprietors' income—less contributions for government social insurance plus an adjustment to convert earnings by place of work to a place-of-residence basis.

Note: Estimates may not add to totals because of rounding.
