

# News Release

EMBARGOED UNTIL RELEASE AT 8:30 A.M. EDT, FRIDAY, JUNE 29, 2018

BEA 18-32

Technical: James Rankin (Personal Income) (301) 278-9087 [piniwd@bea.gov](mailto:piniwd@bea.gov)  
 Harvey Davis (PCE) (301) 278-9086 [pce@bea.gov](mailto:pce@bea.gov)  
 Media: Jeannine Aversa (301) 278-9003 [Jeannine.Aversa@bea.gov](mailto:Jeannine.Aversa@bea.gov)

## Personal Income and Outlays: May 2018

**Personal income** increased \$60.0 billion (0.4 percent) in May according to estimates released today by the Bureau of Economic Analysis. **Disposable personal income** (DPI) increased \$63.2 billion (0.4 percent) and **personal consumption expenditures** (PCE) increased \$27.8 billion (0.2 percent).

**Real DPI** increased 0.2 percent in May and **Real PCE** decreased less than 0.1 percent. The **PCE price index** increased 0.2 percent. Excluding food and energy, the PCE price index increased 0.2 percent.

	2018				
	Jan.	Feb.	Mar.	Apr.	May
	Percent change from preceding month				
Personal income:					
Current dollars	0.4	0.4	0.3	0.2	0.4
Disposable personal income:					
Current dollars	0.8	0.3	0.3	0.3	0.4
Chained (2009) dollars	0.5	0.2	0.3	0.1	0.2
Personal consumption expenditures (PCE):					
Current dollars	0.1	-0.1	0.6	0.5	0.2
Chained (2009) dollars	-0.2	-0.2	0.6	0.3	0.0
Price indexes:					
PCE	0.3	0.1	0.0	0.2	0.2
PCE, excluding food and energy	0.2	0.2	0.2	0.2	0.2
	Percent change from month one year ago				
Price indexes:					
PCE	1.6	1.7	2.0	2.0	2.3
PCE, excluding food and energy	1.5	1.5	1.8	1.8	2.0

The increase in personal income in May primarily reflected increases in wages and salaries, personal dividend income, and nonfarm proprietors' income (table 3).

The \$1.4 billion decrease in real PCE in May reflected a decrease in spending for services that was partially offset by an increase in spending for goods (table 7). Within goods, recreational goods and vehicles was the leading contributor to the increase. Within services, the largest contributor to the decrease was spending for household utilities. Detailed information on monthly real PCE spending can be found in [Table 2.3.6U](#).

**Personal outlays** increased \$29.2 billion in May (table 3). **Personal saving** was \$482.0 billion in May and the **personal saving rate**, personal saving as a percentage of disposable personal income, was 3.2 percent (table 1).

### Updates to Personal Income and Outlays

Estimates have been revised for January through April. The percent change from the preceding month for current-dollar personal income, and for current-dollar and chained (2009) dollar DPI and PCE -- revised and as published in last month's release -- are shown below.

	Change from preceding month							
	March				April			
	<u>Previous</u> (Billions of dollars)	<u>Revised</u>	<u>Previous</u> (Percent)	<u>Revised</u>	<u>Previous</u> (Billions of dollars)	<u>Revised</u>	<u>Previous</u> (Percent)	<u>Revised</u>
Personal income:								
Current dollars	40.7	51.1	0.2	0.3	49.5	41.1	0.3	0.2
Disposable personal income:								
Current dollars	34.0	43.9	0.2	0.3	60.9	48.9	0.4	0.3
Chained (2009) dollars	25.3	33.7	0.2	0.3	24.5	12.1	0.2	0.1
Personal consumption expenditures:								
Current dollars	73.9	87.3	0.5	0.6	79.8	68.1	0.6	0.5
Chained (2009) dollars	60.5	72.1	0.5	0.6	42.8	30.9	0.4	0.3

#### **Upcoming Annual Update of the National Income and Product Accounts**

BEA will release the results of the 15th comprehensive (or benchmark) update of the national income and product accounts (NIPAs) in conjunction with the second quarter 2018 "advance" estimate on July 27, 2018. For more information, see the [Technical Note](#). Details on the planned statistical, definitional, and presentational changes are available in the April *Survey of Current Business* article "[Preview of the 2018 Comprehensive Update of the National Income and Product Accounts](#)." An article in the September *Survey* will describe the estimates in detail. Revised NIPA table stubs are available on the [BEA Web site](#).

Next release: July 31, 2018 at 8:30 A.M. EDT  
 Personal Income and Outlays: June 2018

## Additional Information

### Resources

Additional Resources available at [www.bea.gov](http://www.bea.gov):

- Stay informed about BEA developments by reading the BEA [blog](#), signing up for BEA's [email subscription service](#), or following BEA on Twitter [@BEA\\_News](#).
- Historical time series for these estimates can be accessed in BEA's [Interactive Data Application](#).
- Access BEA data by registering for BEA's Data [Application Programming Interface](#) (API).
- For more on BEA's statistics, see our monthly online journal, the [Survey of Current Business](#).
- BEA's [news release schedule](#)

### Definitions

**Personal income** is the income received by, or on behalf of, all persons from all sources: from participation as laborers in production, from owning a home or business, from the ownership of financial assets, and from government and business in the form of transfers. It includes income from domestic sources as well as the rest of world. It does not include realized or unrealized capital gains or losses.

**Disposable personal income** is the income available to persons for spending or saving. It is equal to personal income less personal current taxes.

**Personal consumption expenditures** (PCE) is the value of the goods and services purchased by, or on the behalf of, "persons" who reside in the United States.

**Personal outlays** is the sum of PCE, personal interest payments, and personal current transfer payments.

**Personal saving** is personal income less personal outlays and personal current taxes.

The **personal saving rate** is personal saving as a percentage of disposable personal income.

**Current-dollar estimates** are valued in the prices of the period when the transactions occurred—that is, at "market value." Also referred to as "nominal estimates" or as "current-price estimates."

**Real values** are inflation-adjusted estimates—that is, estimates that exclude the effects of price changes.

For more definitions, see the [Glossary: National Income and Product Accounts](#).

### Statistical conventions

**Annual rates.** Monthly and quarterly values are expressed at seasonally-adjusted annual rates (SAAR). Dollar changes are calculated as the difference between these SAAR values. For detail, see the FAQ "[Why does BEA publish estimates at annual rates?](#)"

**Month-to-month percent changes** are calculated from unrounded data and are not annualized.

**Quarter-to-quarter percent changes** are calculated from unrounded data and are displayed at annual rates. For detail, see the FAQ "[How is average annual growth calculated?](#)"

**Quantities and prices.** Quantities, or "real" volume measures, and prices are expressed as index numbers with a specified reference year equal to 100 (currently 2009). Quantity and price indexes are calculated using a Fisher-chained weighted formula that incorporates weights from two adjacent periods (quarters for quarterly data and annuals for annual data). "Real" dollar series are calculated by multiplying the published quantity index by the current dollar value in the reference year (2009) and then dividing by 100. Percent changes calculated from real quantity indexes and chained-dollar levels are conceptually the same; any differences are due to rounding.

**Chained-dollar values** are not additive because the relative weights for a given period differ from those of the reference year.

p Preliminary

r Revised

1. Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

2. Social security benefits include old-age, survivors, and disability insurance benefits that are distributed from the federal old-age and survivors insurance trust fund and the disability insurance trust fund.

3. Medicare benefits include hospital and supplementary medical insurance benefits that are distributed from the federal hospital insurance trust fund and the supplementary medical insurance trust fund.

4. Consists of nonmortgage interest paid by households.

5. The current-dollar measure is deflated by the implicit price deflator for personal consumption expenditures.

6. Population is the total population of the United States, including the Armed Forces overseas and the institutionalized population. The monthly estimate is the average of estimates for the first of the month and the first of the following month; the annual and quarterly estimates are averages of the monthly estimates.

r Revised

- Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
- Social security benefits include old-age, survivors, and disability insurance benefits that are distributed from the federal old-age and survivors insurance trust fund and the disability insurance trust fund.
- Medicare benefits include hospital and supplementary medical insurance benefits that are distributed from the federal hospital insurance trust fund and the supplementary medical insurance trust fund.
- Consists of nonmortgage interest paid by households.
- The current-dollar measure is deflated by the implicit price deflator for personal consumption expenditures.
- Population is the total population of the United States, including the Armed Forces overseas and the institutionalized population. The monthly estimate is the average of estimates for the first of the month and the first of the following month; the annual and quarterly estimates are averages of the monthly estimates.

r Revised

1. Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

2. Social security benefits include old-age, survivors, and disability insurance benefits that are distributed from the federal old-age and survivors insurance trust fund and the disability insurance trust fund.

3. Medicare benefits include hospital and supplementary medical insurance benefits that are distributed from the federal hospital insurance trust fund and the supplementary medical insurance trust fund.

4. Consists of nonmortgage interest paid by households.

5. The current-dollar measure is deflated by the implicit price deflator for personal consumption expenditures.

1. Food consists of food and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.

2. Consists of gasoline and other energy goods and of electricity and gas services.

3. Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.

p Preliminary

r Revised

1. Food consists of food and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.

2. Consists of gasoline and other energy goods and of electricity and gas services.

3. Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.
