/1/ While it may be tempting to impute a value for land owned by a given sector as the difference between the value of real estate and current-cost net stock, it is not recommended. The two measures are estimated independently from one another and rely on different source data.

/2/ In BEA's fixed assets accounts, "households" includes both tenant- and owner-occupied assets. In the Federal Reserve Board's FAUSs and in BEA's NIPAs, "households" includes owner-occupied housing only.
