

BROAD GROWTH ACROSS STATES IN 2014

Advance Statistics of GDP by State

U.S. Bureau of Economic Analysis

- Real GDP increased in 48 states and the District of Columbia in 2014. Leading industry contributors were professional, scientific, and technical services; nondurable goods manufacturing; and real estate and rental and leasing.
- Professional, scientific, and technical services was the largest contributor to U.S. real GDP by state growth in 2014. This industry contributed to real GDP growth in 46 states and the District of Columbia. It was a large contributor to growth in three states—California, Massachusetts, and Utah.
- Nondurable goods manufacturing was the leading contributor to growth in the Great Lakes region and made a substantial contribution to growth in Louisiana and Montana.
- Real estate and rental and leasing contributed to real GDP growth in 32 states and the District of Columbia.
- Mining was the leading contributor to growth in the five fastest growing states—North Dakota, Texas, West Virginia, Wyoming, and Colorado.
- In contrast, agriculture, forestry, fishing, and hunting subtracted from real GDP growth in six of eight BEA regions and 39 states in 2014.
- Real GDP decreased in Alaska and Mississippi in 2014. Alaska's decrease was primarily due to a decline in mining while the decrease in Mississippi was mainly due to a decline in construction.
- Per capita real GDP ranged from a high of \$66,160 in Alaska to a low of \$31,551 in Mississippi. Per capita real GDP for the U.S. was \$49,469.

BEA data—including GDP, personal income, the balance of payments, foreign direct investment, the input-output accounts, and economic data for states, local areas, and industries—are available on the BEA Web site: www.bea.gov. [E-mail](#) alerts are also available.

NOTE: The next release of GDP by state is scheduled for the summer of 2016.
