

## METROPOLITAN AREA PERSONAL AND PER CAPITA INCOME IN 2003

Personal income increased in all but two of the nation's metropolitan statistical areas (MSAs) from 2002 to 2003, according to newly available estimates released today by the U.S. Bureau of Economic Analysis. This is an improvement over the previous two years when more than twenty metropolitan areas saw their personal income decline. Per capita personal income increased in all but five MSAs from 2002 to 2003, in contrast to the previous two years when that income declined in as many as sixty MSAs.

The table below lists the MSAs with highest and lowest per capita incomes.
