BEA 07-11

### STATE PERSONAL INCOME 2006

U.S. personal income grew 6.3 percent in 2006, up from 5.2 percent in 2005, according to preliminary estimates released today by the U.S. Bureau of Economic Analysis. This is the strongest annual growth rate so far in the economic expansion which began in December 2001. All eight BEA regions registered solid accelerations in personal income growth. For the third consecutive year, the Southwest region enjoyed the fastest growth (8.3 percent up from 7.7 percent) and the Great Lakes region saw the slowest growth (4.8 percent up from 4.0 percent). The contrast between the two regions reflects a mining boom in the Southwest and employment losses in auto manufacturing in the Great Lakes.

This news release is available on BEA's Web site at [www.bea.gov/bea/rels.htm](http://www.bea.gov/bea/rels.htm).

-- more --

All but 11 states enjoyed an acceleration in personal income growth. Louisiana's 19.4 percent growth following an 8.7 percent decline in 2005 was the most impressive. The wide swing in its growth rate reflects the consequences of the property lost in two hurricanes and the state's subsequent recovery (See *What are the effects of Hurricanes Katrina, Rita, and Wilma on Monthly Personal Income?* at [www.faq.bea.gov](http://www.faq.bea.gov)). The compensation component of personal income grew 6.6 percent in Louisiana in 2006; the other components (the parts most affected by property losses) grew 56.9 percent. Compared with 2004, Louisiana's personal income is 9.0 percent higher while the U.S. is 11.8 percent higher.

Michigan grew the slowest of all states in 2006 (3.1 percent) and was one of the eleven with braking personal income growth (down from 3.5 percent in 2005). Conditions are attributable to cutbacks in auto industry employment, especially in the last half of the year. The cutbacks are offset in the earnings data by the payment of lump-sum wages to workers accepting buyout offers. The downturn in automotive employment had ripple effects on earnings in other industries, particularly construction and real estate.

Inflation (as measured by the national price index for personal consumption expenditures) was 2.8 percent in 2006 down from 2.9 percent in 2005.

**Per capita income.** U.S. per capita income grew 5.2 percent in 2006, up from 4.2 percent growth in 2005.

Louisiana's per capita income rebounded 25.5 percent in 2006 after falling 9.0 percent in 2005. The extreme oscillation in Louisiana results from accounting for all of the uninsured fixed assets destroyed by Hurricanes Katrina and Rita in 2005, a population loss of more than 200 thousand residents (many low-income), and solid wage gains in 2006.

**States with the highest and lowest per capita income growth rates 2005-2006**

Rank	State	Growth rate	Rank	State	Growth rate
1	Louisiana	25.5	41	Wisconsin	4.3
2	Wyoming	9.0	42	Oregon	4.3

10	New Jersey	5.7	50	Georgia	3.2

Source: U.S. Bureau of Economic Analysis

Connecticut led the nation with a per capita income of \$49,852. This is 37 percent above the national average. Typically, the top ten states with the highest per capita

incomes are the same year after year, although some of the states trade places. Wyoming, however, following a sustained ten-year climb, returns to the top ten after an absence of 23 years. Its ranking is strongly tied to the state of the mining industry which has a very long-term expansionary and contractionary cycle.

Mississippi had the lowest per capita income of all states, \$26,535. This is 27 percent below the national average. The bottom ten states were all ranked in the bottom ten last year.

The annual personal income and per capita income estimates in this news release are preliminary and will be revised later this year when more complete and more detailed data become available. The estimates for 2006 reflect more than usual uncertainty, particularly for Louisiana which lost about 200,000 residents, and which is still feeling the effects of the disasters of 2005 (e.g. FEMA transferred about \$700 million in assistance to residents of Louisiana in 2006).

**Fourth quarter personal income.**<sup>1</sup> In the fourth quarter of 2006, U.S. personal income growth equaled the 1.2 percent rate it grew in the third quarter. However, the pace of growth as the year ended slowed from the 2.2 percent rate at which personal income was growing when the year began. Growth accelerated in eighteen states and decelerated in twenty-five in 2006:4.

Extraction of minerals (including oil, gas, copper, nickel, uranium, and gold) in the belt stretching from Louisiana, Texas, Oklahoma and New Mexico northward through Colorado, Wyoming, and Montana and into Alaska, continued its strong contribution to earnings growth. It made the mining industry the biggest contributor to fourth-quarter earnings growth in four of these states.

On the other hand, construction subtracted from earnings growth in most states with the notable exceptions of Louisiana, which is still rebuilding property damaged and destroyed by the disasters of 2005, and Wyoming, whose mining sector continues to support construction. Construction also contributed small amounts to earnings growth in about ten other states, generally ones like Nevada and Texas with the fastest personal income growth.

The price level (as measured by the national price index for personal consumption expenditures) fell 0.2 percent in the fourth quarter after rising 0.6 percent in the third quarter.

---

<sup>1</sup> NOTE.—Quarterly estimates are expressed at seasonally adjusted annual rates, unless otherwise specified. Quarter-to-quarter dollar changes are differences between published estimates. Quarter-to-quarter percent changes are calculated from unrounded data and are not annualized.

## Definitions

**Personal income** is the income received by all persons from all sources. Personal income is the sum of net earnings by place of residence; dividends, interest, and rental income (property income) of persons; and personal current transfer receipts. **Net earnings** is earnings by place of work (the sum of wage and salary disbursements (payrolls), supplements to wages and salaries, and proprietors' income) less contributions for government social insurance, plus an adjustment to convert earnings by place of work to a place-of-residence basis. Personal income is measured before the deduction of personal income taxes and other personal taxes and is reported in current dollars (no adjustment is made for price changes).

The estimate of personal income in the United States reported here is derived as the sum of the state estimates and the estimate for the District of Columbia; it differs slightly from the estimate of personal income in the national income and product accounts (NIPAs) because of minor differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data.

BEA groups all 50 states and the District of Columbia into eight distinct regions for purposes of data collecting and analyses: **New England** (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont); **Mideast** (Delaware, District of Columbia, Maryland, New Jersey, New York, and Pennsylvania); **Great Lakes** (Illinois, Indiana, Michigan, Ohio, and Wisconsin); **Plains** (Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota); **Southeast** (Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia); **Southwest** (Arizona, New Mexico, Oklahoma, and Texas); **Rocky Mountain** (Colorado, Idaho, Montana, Utah, and Wyoming); and **Far West** (Alaska, California, Hawaii, Nevada, Oregon, and Washington).

BEA's national, international, regional, and industry estimates; the *Survey of Current Business*; and BEA news releases are available without charge on BEA's Web site at [www.bea.gov](http://www.bea.gov). By visiting the site, you can also subscribe to receive free e-mail alerts of BEA releases and announcements.

1. Net earnings is earnings by place of work--the sum of wage and salary disbursements, supplements to wages and salaries, and proprietors' income--less contributions for government social insurance plus an adjustment to convert earnings by place of work to a place-of-residence basis.

2. Not meaningful

Note: Estimates may not add to totals because of rounding.

1. Earnings by place of work is the sum of wage and salary disbursements (payrolls), supplements to wages and salaries, and proprietors' income.

2. "Other" consists of the wage and salary disbursements to U.S. residents employed by international organizations and foreign embassies and consulates in the U.S.

3. Data are suppressed to avoid disclosure of confidential information.

1. Net earnings is earnings by place of work--the sum of wage and salary disbursements, supplements to wages and salaries, and proprietors' income--less contributions for government social insurance plus an adjustment to convert earnings by place of work to a place-of-residence basis.

Note: Estimates may not add to totals because of rounding.
