

## Local Area Personal Income for 2002–2004

By David Lenze

**P**ERSONAL income accelerated in most of the Nation's 361 metropolitan statistical areas (MSAs) in 2004, according to the most recent estimates of local area personal income for 2002–2004 from the Bureau of Economic Analysis (BEA). In fact, personal income growth in fewer than one in six MSAs was lower in 2004 than in the previous year. Most of these slower growing MSAs were in the Great Lakes Region and had relatively large motor vehicle manufacturing sectors.

Income growth in MSAs with higher growth in 2004 reflected faster growth in wages per job and in employment and population. Wages per job increased 4.1 percent in these MSAs, 1 percentage point more than in MSAs with either decelerating growth or contractions

in 2004. Also, average employment growth was 1.4 percent in these faster growing MSAs, and population growth was 1.1 percent. In contrast, the 0.4-percent employment growth lagged the 0.6-percent population growth in slower growing areas.

Almost 100 MSAs lost population or employment or both in 2004. Nevertheless, personal income increased in all but five MSAs, and per capita personal income grew in all but seven MSAs. Per capita income grew faster than the inflation rate (2.6 percent as measured by the national price index for personal consumption expenditures) in all but 19 MSAs (chart 1).

**Per capita personal income rankings.** Bridgeport-Stamford-Norwalk, Connecticut, continued to have

**Chart 1. MSA Income and Employment Growth: Percent Change, 2004**

the highest per capita income of all MSAs in 2004 (table A). The \$62,979 average income was nearly double the national average and more than four times greater than the MSA with the lowest average income. Seattle-Tacoma-Bellevue, Washington, is new to the top 10, displacing Sebastian-Vero Beach, Florida. The special Microsoft dividend paid at the end of 2004 contributed \$1,727 to Seattle's per capita income—about 20 times the national average; most of Microsoft's largest shareholders live in that MSA. Sebastian's personal income was affected by several hurricanes that destroyed substantial property. Other metropolitan areas in the eastern United States were also similarly

and stakeholders in pension funds. The dividend had a strong effect on personal income in Seattle-Tacoma-Bellevue, Washington, and a small effect elsewhere.

BEA relies on tabulations of Federal income tax returns to estimate dividends for local areas. Because county tabulations for 2004 are not yet available, BEA extrapolated the 2003 data and added a special adjustment to reflect the special Microsoft dividend. A small number of Microsoft insiders received a large portion (\$5.2 billion) of the dividend. These dividends were allocated to the county they reside in (primarily King

**Table A. Per Capita Personal Income for Metropolitan Statistical Areas**

McAllen-Edinburg-Mission, TX .....	14,938	15,460	47.4	46.8

affected.

McAllen-Edinburg-Mission, Texas, continued to have the lowest per capita income of all MSAs. Its \$15,460 average income was less than half of the national average. Nine of the ten MSAs with the lowest per capita incomes in 2003 also had the lowest incomes in 2004. Las Cruces, New Mexico, is new to the bottom 10 this year, displacing Madera, California.

The difference between the highest and lowest income areas widened in 2004 as per capita income in all but 1 of the top 10 MSAs grew faster than the national average, while per capita income in all but 1 of the bottom 5 MSAs grew slower than the national average.

**Microsoft dividend.** In December 2004, the Microsoft Corporation paid a special dividend to shareholders. BEA estimates that \$24.9 billion of the \$32.0 billion dividend was paid to persons in the United States—to shareholders, investors in mutual funds,

### Acknowledgements

The annual estimates of local area personal income were prepared by the Regional Economic Measurement Division under the direction of Robert L. Brown, Chief. John W. Ruser, Associate Director for Regional Economics, provided general guidance. The preparation of the estimates was a division-wide effort.

The estimates of nonfarm wages and salaries and supplements to wages and salaries were prepared by the Regional Wage Branch under the supervision of Sharon C. Carnevale, Chief. Major responsibilities were assigned to Elizabeth P. Cologer, John D. Laffman, Michael G. Pilot, Mauricio Ortiz, John A. Rusinko, James M. Scott, and Elizabeth F. Stell. Contributing staff members were Peter Battikha, Michael L. Berry, Ji Byun, Susan P. Den Herder, Terence J. Fallon, Tina C. Highfill, Mark W. Hodgins, Russell C. Lusher, Paul K. Medzerian, Katherine M. Yang, and Jaime Zenzano.

The estimates of farm wages and salaries, farm supplements to wages and salaries, proprietors' income, property income, personal current transfer receipts, contributions for government social insurance, and the adjustment for residence were prepared by the Regional Income Branch under the supervision of James M. Zavrel, Chief. Major responsibilities were assigned to Charles A. Jolley, Carrie L. Litkowski, Jeffrey L. Newman, and James P. Stehle. Contributing staff members were Daniel R. Corrin, Eli F. Dourado, Michelle A. Harder, Toan A. Ly, Brian J. Maisano, W. Tim McKeel, Loren C. Morales, and Troy P. Watson.

The public use tabulations and data files were assembled and the tables were prepared by the Regional Economic Information System Branch under the supervision of Kathy A. Albetski, Chief. Major responsibilities were assigned to Gary V. Kennedy. Contributing staff members were Alison M. Adam, Giselle Cubillos-Moraga, H Steven Dolan, Andre Garber, Michael J. Paris, Callan S. Swenson, and Monique B. Tyes.

County, Washington). The remainder of the dividends was allocated to other counties in proportion to BEA's estimates of county personal dividend income in 2003 (excluding dividends from subchapter S corporations).<sup>1</sup> Excluding Seattle-Tacoma-Bellevue, Washington, the Nation's most populous MSAs received the largest shares of the dividend. However, on a per capita basis, many smaller MSAs ranked as the largest recipients, reflecting the importance of stockholding as a source of income for their residents. Five of the top ten of these MSAs are in Florida (table B).

**Hurricanes Charley, Frances, Ivan, and Jeanne.** In several hundred counties in the eastern United States, personal income was affected by Hurricanes Charley, Frances, Ivan, and Jeanne in 2004 (chart 2). These hurricanes caused substantial damage to the fixed assets

1. Microsoft is taxed under subchapter C of the Internal Revenue Code. It pays taxes on its profits and Microsoft shareholders pay taxes when the profits are distributed to them as dividends. In contrast, subchapter S corporations do not pay taxes on profits; shareholders must report their portion of the corporation's profits or losses on their individual income tax returns, whether or not they actually receive cash. The regional distributions of subchapter S dividends and other dividends are quite different.

(residential and nonresidential structures and equipment and software) of household enterprises (proprietorships, partnerships, and housing). This damage is recorded as consumption of fixed capital (CFC) in the personal income account and is an expense deducted in the derivation of proprietors' income and the rental income of persons. Insurance claims in excess of normal, or expected, losses are recorded as business transfer payments from the insurance industry to household enterprises. Therefore, only uninsured

### Data Availability

This article presents summary estimates of personal income and per capita personal income for 2002–2004. More detailed estimates for 1969–2004 are also available.

The following annual estimates for counties, metropolitan statistical areas, micropolitan statistical areas, metropolitan divisions, combined statistical areas, and BEA economic areas are available at <[www.bea.gov/bea/regional/reis](http://www.bea.gov/bea/regional/reis)>:

- Personal income, per capita personal income, and population for 1969–2004
- County income and employment summary (featuring the derivation of personal income that includes non-farm personal income and employment totals for a continuous time series) for 1969–2004
- Compensation of employees by industry by North American Industry Classification System (NAICS) subsectors for 2001–2004 and by Standard Industrial Classification System (SIC) two-digit industries for 1998–2000
- Personal income by major source and earnings by NAICS subsectors for 2001–2004 and by SIC two-digit industries for 1969–2000
- Full-time and part-time employment by NAICS subsectors for 2001–2004 and by SIC division-level industries for 1969–2000
- Regional economic profiles (featuring a selection of personal income and employment data) for 1969–2004
- Personal current transfer receipts by major program for 1969–2004

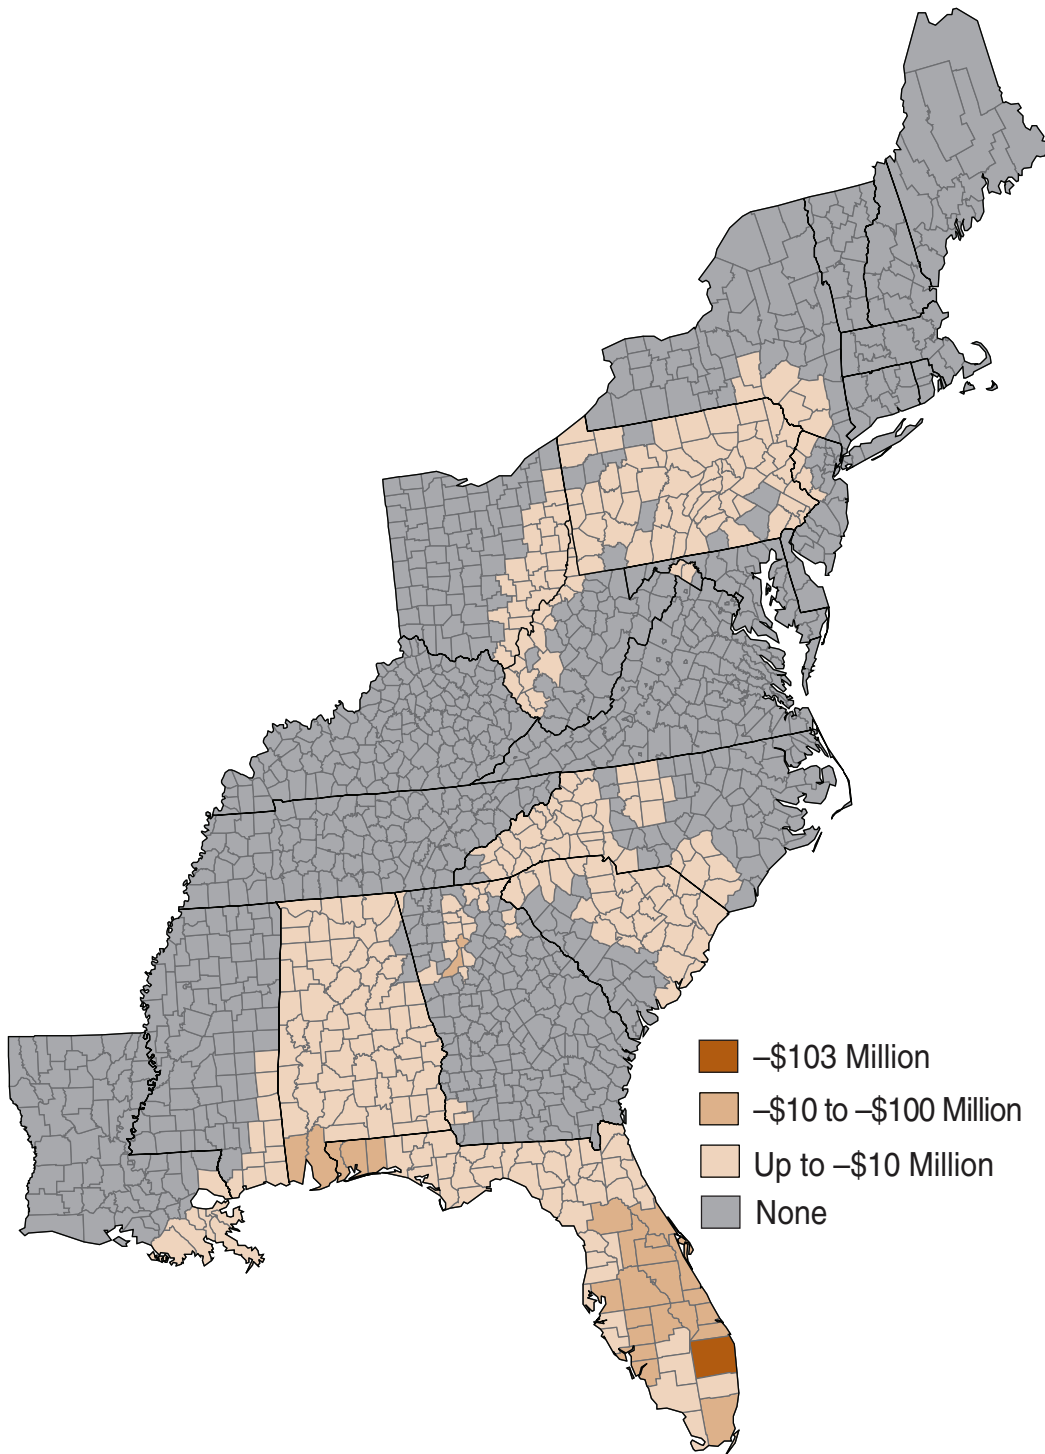

- Farm income and expenses (including the major categories of gross receipts and expenses for all farms and for measures of farm income) for 1969–2004
- Personal income and per capita personal income for 2002–2004, including 2004 rankings by per capita personal income for counties and counties with the highest and lowest per capita personal incomes in 2004
- Total wage and salary disbursements, total wage and salary employment, and average wage per job for 1969–2004
- BEARFACTS, a narrative about an area's personal income that uses current estimates, growth rates, and a breakdown of the sources of personal income

In addition, the entire set of estimates for all areas will be available in May 2006 on a DVD-ROM that also includes an updated description of the sources and methods used to estimate local area personal income. To order the DVD-ROM *Regional Economic Information System, 1969–2004* (product number RCN-0652), call the Order Desk at 1-800-704-0415 (outside the United States, call 202-606-9666).

The local area personal income estimates are also available through the members of the BEA User Group, which consists of state agencies and universities that help BEA to disseminate the estimates in their states. For a list of the BEA User Group on BEA's Web site, go to <[www.bea.gov/bea/regional/docs/usergrp.cfm](http://www.bea.gov/bea/regional/docs/usergrp.cfm)>.

For more information, call BEA's Regional Economic Information System at 202-606-5360, fax 202-606-5322, or e-mail [reis.remd@bea.gov](mailto:reis.remd@bea.gov).

**Chart 2. Hurricane Damage and Net Insurance Settlements Associated with Hurricanes Charley, Frances, Ivan, and Jeanne**

losses affect proprietors' income and the rental income of persons, reducing these measures to levels below what they would have been had there been no hurricanes.

BEA treats consumer durable goods (such as cars, boats, and household appliances) as consumption, not as capital investment. Therefore, damage to these goods does not affect CFC. Insurance claims by households for damage to consumer durable goods in excess of normal, or expected, losses are recorded in personal current transfer receipts.

Other effects of the hurricanes, such as the effects on wage and salary disbursements, are embedded in the source data used to estimate personal income and did not require special estimation.

Because uninsured hurricane losses to fixed assets and insured hurricane losses of consumer durable goods are not reflected in the source data used to estimate personal income, BEA estimated these losses by state, using a methodology similar to that used for the national estimates. On the basis of industry estimates of insured losses by state and the proportion of households lacking insurance coverage, BEA derived an estimate of uninsured losses. The average deductible on insurance policies is included in this estimate of uninsured losses. Most of the losses were in Florida. BEA used county estimates of insured losses from the Florida Office of Insurance Regulation and county estimates of disaster assistance from the Federal Emergency Management Agency to allocate state estimates to counties.

Combined hurricane damage and net insurance settlements were highest in Orlando-Kissimmee, Florida, but as a percentage of personal income, damages and settlements were highest in Punta Gorda, Florida (table C).

**Source data and revisions.** The primary data sources used by BEA to prepare the estimates of local

area personal income for 2004 are wages and salaries from the Bureau of Labor Statistics, farm production and income from the U. S. Department of Agriculture and state agricultural statistical agencies, benefits paid by the Social Security Administration and Medicaid from the Centers for Medicare and Medicaid Services and state departments of social services, various transfer receipts from the *Consolidated Federal Funds Report*, *Federal Assistance Award Data System*, *State Government Finances*, and *State and Local Government Finances*, and population data from the Census Bureau. Medicare benefits were extrapolated using enrollment data for 2004. The residence adjustment and dividends, interest, and rent for 2004 were extrapolated from tabulations of Federal income tax returns from the Internal Revenue Service (IRS) for 2003. Estimates of nonfarm proprietors' income for 2004 were extrapolated from IRS data for 2002.<sup>2</sup>

Estimates for 2002 and 2003 are revised. The revisions to estimates of personal income for 2002 were small: For more than three-fourths, or 276, of the

2. For details about the estimation methodology and data sources, see *Local Area Personal Income and Employment Methodology* on BEA's Web site at <[www.bea.gov/bea/regional/articles/lapi2004](http://www.bea.gov/bea/regional/articles/lapi2004)>.

MSAs, personal income was revised up or down by 1.0 percent or less (chart 3). The revisions to the 2003 estimates were generally larger, reflecting the incorporation of newly available data on property and nonfarm proprietors' income. The average algebraic revision was only -0.1 percent for 2002 and 0.1 percent for 2003; the mean absolute revisions were somewhat larger—0.7 percent for 2002 and 1.2 percent for 2003.<sup>3</sup>

For both Springfield, Illinois, and Champaign-Urbana, Illinois, personal income was revised up in

2003 by unusually large amounts (15.4 percent and 17.2 percent, respectively) because of new information about a \$7.3 billion state government catchup contribution for underfunded employee pension funds. The contribution affected all MSAs in Illinois, but the consequences were most pronounced in these two MSAs because the state government accounts for a large share of their economies. Such contributions are treated as a component of employee compensation in the personal income account. The large one-time contribution is also reflected in the declines in personal income 2003–2004 in these two MSAs (8.6 percent and 8.4 percent, respectively).

3. The standard deviation of the algebraic revisions was 1.0 in 2002 and 1.9 in 2003.

**Chart 3. Frequency Distribution of Revisions to MSA Personal Income**

*Tables 1 through 3 begin on page 35.*

### Alternative Measures of County Employment and Wages

Three widely used measures of county employment and wages by place of work are employment and payroll in the *County Business Patterns* (CBP) series from the Census Bureau, employment and wages from the Quarterly Census of Employment and Wages (QCEW) program from the Bureau of Labor Statistics (BLS), and wage and salary disbursements and employment from the Bureau of Economic Analysis (BEA). These measures differ in source data and coverage.

The CBP data are derived from Census Bureau business establishment surveys and Federal administrative records. The QCEW data are tabulations of monthly employment and quarterly wages of workers who are covered by state unemployment insurance programs or by the unemployment insurance program for Federal employees.<sup>1</sup> The BEA estimates of employment and wages are primarily derived from the BLS data; the estimates for industries that are either not covered or not fully covered in the QCEW are also based on supplemental data from other agencies, such as the Department of Defense, the U.S. Department of Agriculture, and the Railroad Retirement Board.

The coverage of the Census Bureau data differs from that of the BLS data primarily because the Census Bureau data exclude most government employees and because the BLS data cover civilian government employees.<sup>2</sup> The BLS data also include some farm and private household employees that are excluded from the Census Bureau data. However, the Census Bureau data cover the employees of educational institutions, membership organizations, and small nonprofit organizations in other industries more completely than the BLS data.<sup>3</sup> In addition, the Census Bureau reports employment only for the month of March; the BLS employment data are quarterly and annual averages of monthly data.

In 2001, both BLS and BEA began to include employees of Indian tribal councils in local government. These employees were previously included in the relevant private industries.<sup>4</sup> In the Census Bureau data, these employees are still classified in private industries.

The BEA estimates of employment and wages differ from the BLS data because BEA adjusts the estimates to account for employment and wages that are not covered or that are not fully covered by the unemployment insurance programs. BEA adds estimates of employment and wages to the BLS data to bridge

small gaps in coverage for nonprofit organizations that do not participate in the unemployment insurance program (in several industries), for students and their spouses employed by colleges or universities, for elected officials and members of the judiciary, for interns employed by hospitals and by social service agencies, and for insurance agents classified as statutory employees. In addition, BEA uses supplemental source data to estimate most, or all, of the employment and wages for the following: Farms, farm labor contractors and crew leaders, private households, private elementary and secondary schools, religious membership organizations, rail transportation, military, and U.S. residents who are employed by international organizations and by foreign embassies and consulates in the United States. BEA also adjusts for employment and wages subject to unemployment insurance, but not reported by employers. Other adjustments to wages include estimates for unreported tips, judicial fees paid to jurors and witnesses, compensation of prison inmates, and marriage and license fees paid to justices of the peace.<sup>5</sup>

The Census Bureau released 2003 data for total employment and payrolls for counties on its Web site on July 29, 2005; go to <[www.census.gov/epcd/cbp/view/cbpview.html](http://www.census.gov/epcd/cbp/view/cbpview.html)>. BLS released county data on total employment and average weekly pay for the fourth quarter of 2004 on its Web site on July 19, 2005; go to <[www.bls.gov/cew/](http://www.bls.gov/cew/)>. Annual QCEW data for 2004 are also available. BEA released preliminary estimates for 2004 and revised estimates for 2002–2003 of total wage employment and total wage and salary disbursements for counties on its Web site on December 30, 2005. To access the data, go to <[www.bea.gov/beat/regional/reis/](http://www.bea.gov/beat/regional/reis/)>.

5. For a detailed description of the sources and methods used to prepare the estimates, go to <[www.bea.gov/beat/regional/articles/lapi2004](http://www.bea.gov/beat/regional/articles/lapi2004)>.

#### National Estimates of Wages and Salaries in the BEA County Estimates and Payrolls and Wages From the Census Bureau and BLS

[Billions of dollars]

	2002	2003	2004
Total payroll, Census Bureau .....	3,943.2	4,040.9	n.a.
Plus: Differences in coverage:			
Civilian government wages, BLS <sup>1</sup> .....	777.9	803.8	n.a.
Other differences, net <sup>2</sup> .....	-6.7	-18.4	n.a.
Equals: Total wages, BLS .....	4,714.4	4,826.3	5,087.6
Plus: Adjustments by BEA:			
For unreported wages and unreported tips on employment tax returns	106.6	110.3	114.2
For wages and salaries not covered or not fully covered by unemployment insurance:			
Private .....	84.9	89.3	98.0
Government .....	69.4	78.8	83.4
Other adjustments <sup>3</sup> .....	1.2	0.7	0.7
Equals: Wage and salary disbursements, BEA <sup>4</sup> .....	4,976.5	5,105.4	5,383.9

1. BLS wages were adjusted to remove the wages of Indian tribal councils because these data were already included in the Census Bureau's total payroll data.

2. Includes differences of coverage in private education, membership organizations, and government.

3. Consists of adjustments to the wage and salary estimates to remove employees of U.S. companies stationed overseas, to add U.S. residents who are employed by international organizations and by foreign embassies and consulates in the United States, and to reflect updates to published QCEW data.

4. The national total of county estimates of wage and salary disbursements consists of the earnings of persons who live in the United States and of foreign residents working in the United States. The BEA regional total differs from BEA's national estimate of wage and salary disbursements because National Income and Product Account (NIPA) income includes the earnings of Federal civilian and military personnel stationed abroad and U.S. residents on foreign assignments for less than a year. Unlike the regional estimates, the national estimate only includes the earnings of foreign residents if they live and work in the United States for a year or more.

n.a. Not available

Adrienne T. Pilot

1. The QCEW data account for 95 percent of BEA's wages and salaries.

2. The Census Bureau data cover only those government employees who work in government hospitals, federally chartered savings institutions and credit unions, liquor stores, and wholesale liquor establishments. The BLS data in most states exclude state and local elected officials, members of the judiciary, state national and air national guardsmen, temporary emergency employees, and employees in policy and advisory positions.

3. The BLS data do not cover certain religious elementary and secondary schools, because a Supreme Court decision exempts some of these schools from unemployment compensation taxes. The BLS data also exclude college students (and their spouses) who are employed by the school in which they are enrolled and student nurses and interns who are employed by hospitals as part of their training. In half of the states, the BLS data only include nonprofit organizations with four or more employees during 20 weeks in a calendar year.

4. For example, employees of casinos owned by tribal councils were included in the North American Industry Classification System subsector "Amusement, Gambling, and Recreation Industries."

1. Per capita personal income was computed using Census Bureau midyear population estimates.

2. Percent change calculated from unrounded data.

3. The personal income level shown for the United States is derived as the sum of the county estimates. It differs from the estimate of personal income in the national income and product accounts because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of

source data.

4. The metropolitan area definitions used by BEA for its personal income estimates are the new county-based definitions issued by the Office of Management and Budget in June 2003 (with revisions released February 2004, March 2005, and December 2005) for Federal statistical purposes.

Table 2. Personal Income and Per Capita Personal Income by Economic Area, 2002–2004
