GUIDE TO INDUSTRY CLASSIFICATIONS FOR INTERNATIONAL SURVEYS, 2007

Industry classifications adapted from the 2007 North American Industry Classification System (NAICS)
INDUSTRY CLASSIFICATIONS

The international surveys industry (ISI) classifications described here are to be used when completing the industry classifications items in BEA’s surveys of direct investment and services. The classifications and their code numbers were adapted by BEA from the 2007 North American Industry Classification System (hereafter referred to as the “2007 NAICS”). Industry classifications in the previous version of this guide were adapted from the 2002 North American Industry Classification System.

Changes to ISI codes

Reflecting the changes made to the NAICS for 2007, the new 2007 ISI classifications differ significantly from the 2002 ISI classifications for the Information sector. In addition, minor changes were made to certain activities included in a few industries within the Agriculture, Manufacturing, and Services sectors. If you have activities in these sectors, please classify them carefully using the new ISI codes. The table on the next page summarizes the changes for all sectors. For additional information, refer to the detailed description of the ISI codes that follow in this guide and in the 2007 NAICS manual.

As noted above, the Information sector’s 2007 ISI classifications differ significantly from its 2002 ISI classifications. In particular, activities that were previously covered by ISI codes 5161 (Internet publishing and broadcasting), 5173 (telecommunications resellers), 5175 (cable and other program distribution), and 5181 (Internet service providers and web search portals) have been moved to other ISI codes in the sector. These changes were made so that ISI classifications reflect the infrastructure used rather than the product offered.

For reporting on BEA surveys, 201 individual ISI classifications were adapted from the 2007 NAICS, and each has been assigned a four-digit numerical code. (The previously used 2002 ISI classifications had 206 four-digit codes.) The titles of some ISI classifications, by themselves, may not be sufficiently descriptive to classify certain activities. More information on the content of each classification is provided in the detailed definitions that follow. For some classifications, a “NOTE” given after the definition lists closely related activities and ISI codes NOT included in the classification being defined.

For the convenience of those U.S. reporters familiar with the 2007 NAICS, the 2007 NAICS code or codes that correspond to a given ISI classification are shown in parentheses under the heading of each classification. Because differences between a given ISI classification and the corresponding 2007 NAICS classification(s) may exist, the detailed definitions of the ISI classifications should be consulted when completing industry classification items in the survey.

AGRICULTURE, FORESTRY, FISHING, AND HUNTING

The agriculture, forestry, fishing, and hunting sector (ISIC codes 1110-1150) comprises businesses that are engaged in growing crops, raising animals, harvesting timber, and harvesting fish and other animals from a farm, ranch, or their natural habitats. The sector distinguishes two basic activities: agricultural production and agricultural support activities. Agricultural production includes businesses performing the complete farm or ranch operation, such as farm owner-operators, tenant farm operators, and sharecroppers. Agricultural support activities include businesses that perform one or more activities associated with farm operation, such as soil preparation, planting, harvesting, and management, on a contract or fee basis.

The mining, quarrying, and oil and gas extraction sector (ISI codes 2111–2133) comprises businesses that extract naturally occurring mineral solids, such as coal and ores; liquid minerals, such as crude petroleum; and gases, such as natural gas. The term mining is used in the broad sense to include quarrying, well operations, crushing, washing, and other operations performed at the mine site. This sector consists of two basic activities: (1) mine operation and (2) mining support activities. Mine operations are classified according to the natural resource mined. Businesses that mine, but further process the mined materials into a finished product, are classified in manufacturing. For example, a business operating a granite quarry, producing dimension stone, and further shaping the dimension stone into building stone would be classified in manufacturing.

Work performed includes new work, additions, alterations, or maintenance and repairs. This sector includes businesses engaged in the preparation of sites for new construction and businesses engaged in the subdividing of land for sale as building sites.

Construction performed by a business primarily engaged in an activity other than construction, for its own account and use, and by its own employees (force construction), is excluded from this industry, and is classified according to the principle activity of the business.

2360 Construction of buildings
(2007 NAICS code 236)

Businesses in this industry are primarily responsible for the construction of buildings. The work performed may include new work, additions, alterations, or maintenance and repairs. Part or all of the production work may be subcontracted to other construction businesses.

MANUFACTURING

The manufacturing sector (ISI codes 3111–3399) comprises businesses engaged in the mechanical, physical, or chemical transformation of materials, substances, or components into new products. The assembling of component parts of manufactured products is considered manufacturing, except in cases where the activity is classified in Construction (e.g., structures).

Manufacturing businesses acquire materials that are products of agriculture, forestry, fishing, mining, and quarrying as well as products of other manufacturing businesses. A business may process the materials itself or may contract with another manufacturer to perform the processing on materials which they provide to the other manufacturer. Both types of businesses are included in manufacturing.

The product produced by a manufacturer may be finished for final consumption or it may be a material input for an entity engaged in further manufacturing. For example, the product of an alumina refinery is the input used in the primary production of aluminum; primary aluminum is the input to an aluminum wire drawing plant; and aluminum wire is the input for a fabricated wire product manufacturer.

Within the manufacturing sector, the individual industries generally reflect distinct production processes related to material inputs, production equipment, and employee skills. In the machinery area, where assembling is a key activity, parts and accessories for manufactured products are classified in the industry of the finished manufactured item when they are made for sale separately. For example, a replacement refrigerator door would be classified with refrigerators and an attachment for a piece of metal working machinery would be classified with metal working machinery. However, components and inputs from other manufacturers are classified based on the production function of the component manufacturer.

Some borderline activities that are classified in manufacturing are:

Apparel jobbing (assigning of materials to contract factories or shops for fabrication or other contract operations) as well as contracting on materials owned by others

Mass production of computer software or video tapes from a master copy

Aircraft and aerospace research and development

Printing and related support activities

Fabricating signs and advertising displays

Ready-mixed concrete production

Fresh fish packaging (oyster shucking, fish filleting)

Rebuilding machinery, but not repairing (i.e., automotive parts)

Lapidary work for the trade

Ship repair and renovation

Machine shop work

Tire retreading

Some borderline activities that are not classified in manufacturing are:

Logging is classified in Agriculture, Forestry, Fishing, and Hunting (ISI codes 1110–1150).

The dressing and beneficiating of ores is classified in Mining, Quarrying, and Oil and Gas Extraction (ISI codes 2111–2133).

The construction of structures and fabricating operations performed at the site of construction by contractors is classified in Construction (ISI codes 2360–2380).

The breaking of bulk and redistribution in smaller lots, including packaging and repackaging products, such as liquors or chemicals; the customized assembly of computers; sorting of scrap; mixing paints to customer order; and cutting metals to customer order are classified in Wholesale or Retail Trade (ISI codes 4231–4540).

Publishing and the combined activity of publishing and printing is classified in Information (ISI codes 5111–5191). Although the activity performed is the transformation of information into a product, the value of the product to the consumer lies in the information content, not in the format in which it is distributed (i.e., the book, the software disk).

3111 Animal foods

(2007 NAICS code 3111)

Businesses engaged in manufacturing food and feed for animals from ingredients such as grains, oilseed mill products, and meat products.

**WHOLESALE TRADE**

The wholesale trade sector (ISI codes 4231–4251) comprises businesses engaged in wholesaling merchandise, generally without transformation, and rendering services incidental to the sale of merchandise.

The wholesaling process is an intermediate step in the distribution of merchandise. Wholesalers are organized to sell or arrange the purchase or sale of (a) goods for resale (goods sold to other wholesalers or retailers), (b) capital or durable nonconsumer goods, and (c) raw and intermediate materials and supplies used in production.

Wholesalers sell merchandise to other businesses and normally operate from a warehouse or office. These warehouses and offices are characterized by having little or no display of merchandise. In addition, neither the design nor the location of the premises is intended to solicit walk-in traffic. Wholesalers do not normally use advertising directed to the general public. Customers are generally reached initially via telephone, in-person marketing, or by specialized advertising that may include Internet and other electronic means.

Although in general, wholesaling normally denotes sales in large volumes, durable nonconsumer goods may be sold in single units. Sales of capital or durable nonconsumer goods used in the production of goods and services, such as farm machinery, medium and heavy duty trucks, and industrial machinery are included in wholesale trade.

The sector comprises two main types of wholesalers: (1) merchant wholesalers that sell goods on their own account and (2) business to business electronic markets, agents, and brokers that arrange sales and purchases for others generally for a commission or fee.

The unique characteristics of information and cultural products, and of the processes involved in their production and distribution, distinguish businesses in the Information sector from those in other sectors. Some of these characteristics are:

1. Unlike traditional goods, an "information or cultural product" such as an on-line newspaper or a television program does not necessarily have tangible qualities, nor is it necessarily associated with a particular form.

2. Unlike traditional services, the delivery of informational and cultural products does not require direct contact between the supplier and the consumer.

3. The intangible property aspect of information and cultural products makes the processes involved in their production and distribution different from goods and services. Only those possessing the rights to these works are authorized to reproduce, alter, improve, and distribute them.

4. Distributors of information and cultural products can add value to the products they distribute. For instance, broadcasters add advertising to the original product. This capacity means that unlike other distributors of goods and services, some information distributors may derive revenue not from the sale of the distributed product to the final consumer, but from those who pay for adding information to the original product.
