

News Release

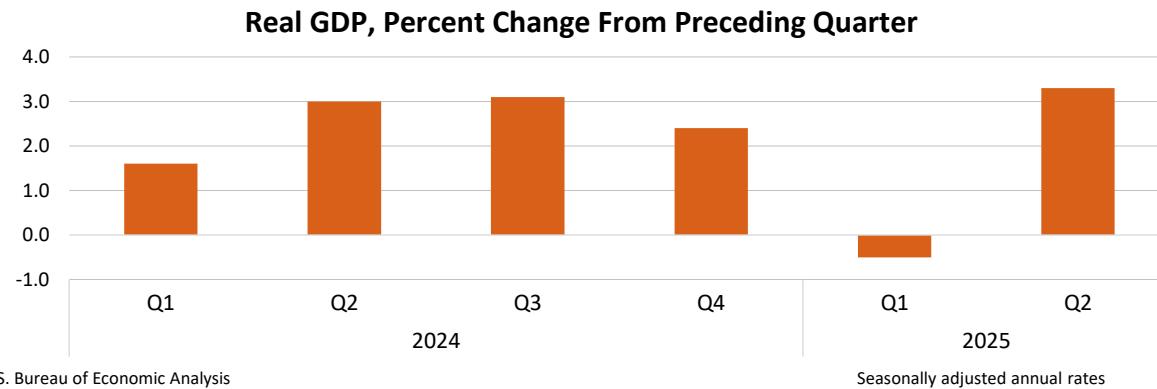

EMBARGOED UNTIL RELEASE AT 8:30 a.m. EDT, Thursday, August 28, 2025

BEA 25-35

Technical: Lisa Mataloni (GDP) 301-278-9083 GDPNIWD@bea.gov
Kate Pinard (Corporate Profits) 301-278-9417 CPNIWD@bea.gov
Media: Connie O'Connell 301-278-9003 Connie.OConnell@bea.gov

Gross Domestic Product (Second Estimate), Corporate Profits (Preliminary Estimate), 2nd Quarter 2025

Real gross domestic product (GDP) increased at an annual rate of 3.3 percent in the second quarter of 2025 (April, May, and June), according to the second estimate released by the U.S. Bureau of Economic Analysis. In the first quarter, real GDP decreased 0.5 percent.

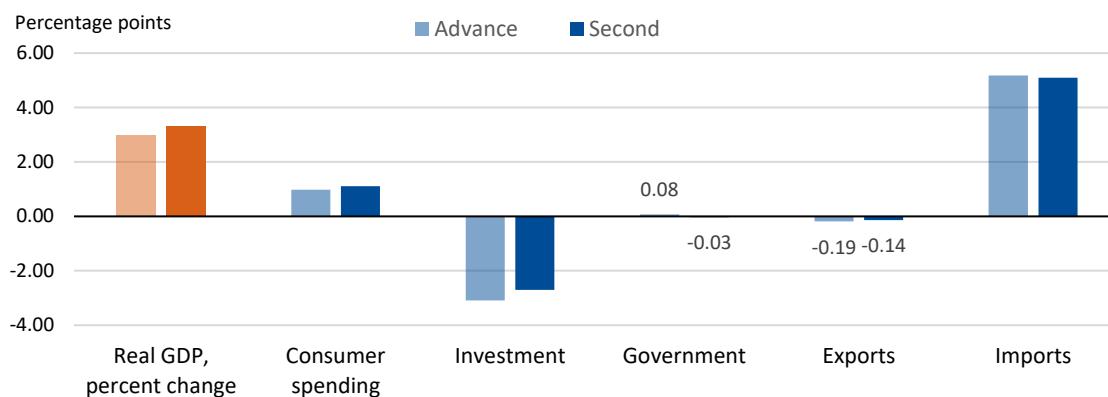

The increase in **real GDP** in the second quarter primarily reflected a decrease in imports, which are a subtraction in the calculation of GDP, and an increase in consumer spending. These movements were partly offset by decreases in investment and exports.

Real GDP was revised up 0.3 percentage point from the advance estimate, primarily reflecting upward revisions to investment and consumer spending that were partly offset by a downward revision to government spending and an upward revision to imports. For more information, refer to the "Technical Notes" below.

Contributions to Percent Change in Real GDP, 2nd Quarter 2025

Real GDP Increased 3.3 Percent

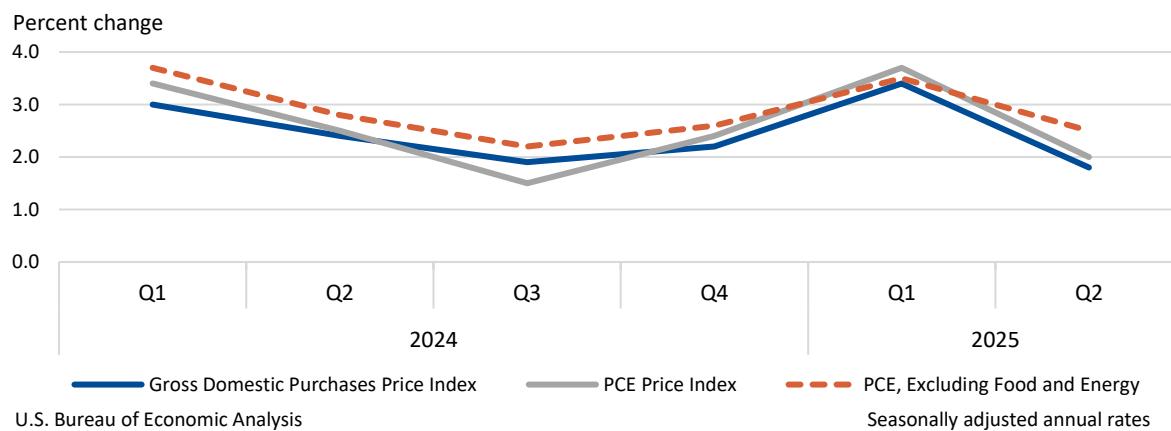

Note. Imports are a subtraction in the calculation of GDP; thus, a decrease in imports results in a positive contribution to GDP.
U.S. Bureau of Economic Analysis Seasonally adjusted annual rates

Compared to the first quarter, the upturn in **real GDP** in the second quarter primarily reflected a downturn in imports and an acceleration in consumer spending that were partly offset by a downturn in investment.

Real final sales to private domestic purchasers, the sum of consumer spending and gross private fixed investment, increased 1.9 percent in the second quarter, revised up 0.7 percentage point from the previous estimate.

The **price index for gross domestic purchases** increased 1.8 percent in the second quarter, revised down 0.1 percentage point from the previous estimate. The **personal consumption expenditures (PCE) price index** increased 2.0 percent, revised down 0.1 percentage point from the previous estimate. Excluding food and energy prices, the PCE price index increased 2.5 percent, the same as previously estimated.

Quarter-to-Quarter Change in Prices

Real gross domestic income (GDI) increased 4.8 percent in the second quarter, compared with an increase of 0.2 percent in the first quarter. The **average of real GDP and real GDI** increased 4.0 percent, in contrast to a decrease of 0.1 percent in the first quarter.

Profits from current production (corporate profits with inventory valuation and capital consumption adjustments) increased \$65.5 billion in the second quarter, in contrast to a decrease of \$90.6 billion in the first quarter.

Real GDP and Related Measures
[Percent Change from Q1 to Q2]

	Advance Estimate	Second Estimate
Real GDP	3.0	3.3
Current-dollar GDP	5.0	5.3
Real final sales to private domestic purchasers	1.2	1.9
Real GDI	...	4.8
Average of real GDP and real GDI	...	4.0
Gross domestic purchases price index	1.9	1.8
PCE price index	2.1	2.0
PCE price index excluding food and energy	2.5	2.5

First Quarter Wages and Salaries

BEA's standard practice for first-quarter estimates of wages and salaries is to incorporate data from the Bureau of Labor Statistics' Quarterly Census of Employment and Wages (QCEW) program as part of the annual update of the National Economic Accounts. New QCEW data for the first quarter of 2025 will be incorporated in next month's release along with the 2025 Annual Update of the National Economic Accounts (refer to box below for details).

For definitions, statistical conventions, updates to GDP, and more, visit "[Additional Information](#)."

Annual Update of the National Economic Accounts

BEA will begin releasing results from the 2025 annual update of the National Economic Accounts, which include the National Income and Product Accounts as well as the Industry Economic Accounts, on September 25, 2025. The update will present revised statistics for GDP, GDP by Industry, and GDI. For details, refer to [Information on 2025 Annual Updates to the National, Industry, and State and Local Economic Accounts](#).

Next release: September 25, 2025, at 8:30 a.m. EDT
 Gross Domestic Product 2nd Quarter 2025 (Third Estimate),
 GDP by Industry, and Corporate Profits (Revised)

Technical Notes

Sources of revisions to real GDP in the second estimate

Real GDP increased at an annual rate of 3.3 percent (0.8 percent at a quarterly rate¹), an upward revision of 0.3 percentage point from the previous estimate, primarily reflecting upward revisions to investment and consumer spending that were partly offset by a downward revision to government spending and an upward revision to imports.

- Within investment, upward revisions to intellectual property products, equipment, and structures were partly offset by a downward revision to private inventory investment.
 - The revision to intellectual property products reflected upward revisions to software, based on new Census Bureau Quarterly Services Survey data, and to research and development, based on newly available R&D expenses reported by publicly traded companies.
 - The revision to equipment was led by transportation equipment (specifically, light trucks), based on new June IHS-Polk registrations data.
 - The revision to structures was led by commercial and health care, based primarily on new June and revised April and May Census Bureau Value Put in Place construction spending data.
 - Within private inventory investment, the revision primarily reflected a downward revision to nonfarm inventories (led by wholesale trade inventories), based primarily on revised Census Bureau book value data.
- The upward revision to consumer spending reflected upward revisions to both goods (notably, pharmaceutical products) and services (notably, health care as well as food services and accommodations).
- Within government, compensation was revised down, primarily reflecting revised BLS Current Employment Statistics data for state and local government.
- For both exports and imports, the revised estimates primarily reflected updated data from BEA's International Transactions Accounts as well as new and revised Census Bureau trade in goods data for June.
 - Within exports, the upward revision was to goods, led by industrial supplies and materials (notably, petroleum and products).
 - Within imports, the upward revision was to goods, led by industrial supplies and materials as well as capital goods, except automotive.

More information on the source data and BEA assumptions that underlie the second-quarter estimate is shown in the [key source data and assumptions](#) table.

¹ Percent changes in quarterly seasonally adjusted series are displayed at annual rates, unless otherwise specified. For more information, refer to the FAQ "[Why does BEA publish percent changes in quarterly series at annual rates?](#)".

^r Revised

1. Real gross domestic income is gross domestic income deflated by the implicit price deflator for gross domestic product.

Note: Users are cautioned that particularly for components that exhibit rapid change in prices relative to other prices in the economy, the chained-dollar estimates should not be used to measure the component's relative importance or its contribution to the growth rate of more aggregate series. For accurate estimates of the contributions to percent changes in real gross domestic product, use table 2.

^rRevised

1. Food excludes personal consumption expenditures for purchased meals and beverages, which are classified in food services.

2. This index is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most implicit prices (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.

^r Revised

1. Personal income is also equal to national income less corporate profits with inventory valuation and capital consumption adjustments, taxes on production and imports less subsidies, contributions for government social insurance, net interest and miscellaneous payments, business current transfer payments (net), and current surplus of government enterprises, plus personal income receipts on assets, and personal current transfer receipts.

2. Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

3. Social security benefits include old-age, survivors, and disability insurance benefits that are distributed from the federal old-age and survivors insurance trust fund and the disability insurance trust fund.

4. Medicare benefits include hospital and supplementary medical insurance benefits that are distributed from the federal hospital insurance trust fund and the supplementary medical insurance trust fund.

5. Consists of nonmortgage interest paid by households. Note that mortgage interest paid by households is an expense item in the calculation of rental income of persons.

6. The current-dollar measure is deflated by the implicit price deflator for personal consumption expenditures.

7. Population is the total population of the United States, including the Armed Forces overseas and the institutionalized population.

1. The current-dollar gross value added is deflated using the gross value added chain-type price index for nonfinancial industries from the GDP-by-industry accounts. For periods when this price index is not available, the chain-type price index for GDP goods and structures is used.

2. Chained-dollar consumption of fixed capital of nonfinancial corporate business is calculated as the product of the chain-type quantity index and the 2017 current-dollar value of the corresponding series, divided by 100.

3. Chained-dollar net value added of nonfinancial corporate business is the difference between the gross value added and the consumption of fixed capital.

4. The deflator for gross value added of nonfinancial corporate business divided by 100.

Note. Estimates in this table are based on the 2017 North American Industry Classification System (NAICS).
