Gross Domestic Product by State and Personal Income by State, 3rd Quarter 2025

Today, the U.S. Bureau of Economic Analysis released new quarterly statistics on gross domestic product and personal income for all 50 states and the District of Columbia for the third quarter of 2025 (July, August, and September).

Gross domestic product (GDP) highlights

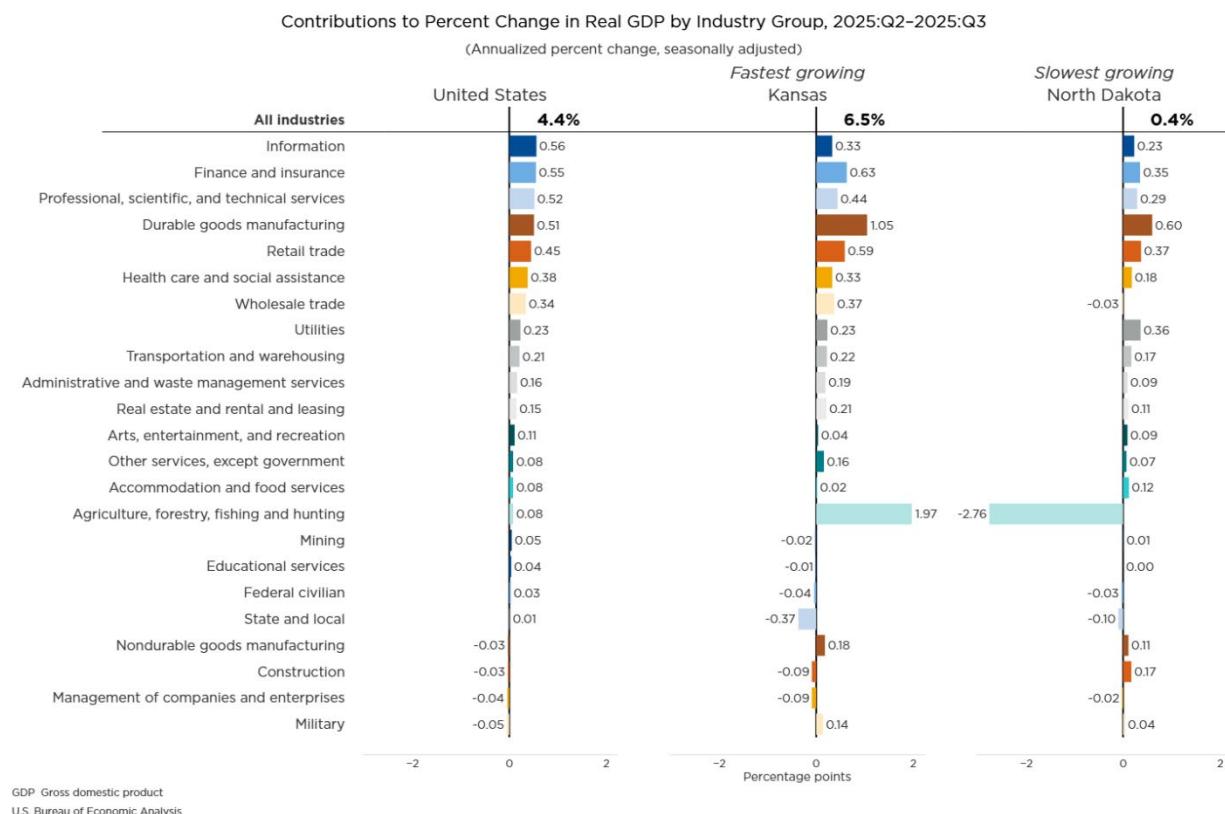

Real GDP increased in all 50 states and District of Columbia in the third quarter of 2025. [Real GDP increased at an annual rate](#) of 4.4 percent nationally and ranged from 6.5 percent in Kansas to 0.4 percent in North Dakota.

U.S. Bureau of Economic Analysis

In the third quarter of 2025, real GDP increased in 19 of the 23 industry groups for which BEA prepares quarterly state estimates. Information; finance and insurance; and professional, scientific, and technical services were the leading contributors to growth in real GDP nationally. These industries were the leading contributors to real GDP growth in nearly half the states. Durable-goods manufacturing also impacted real GDP growth in several states.

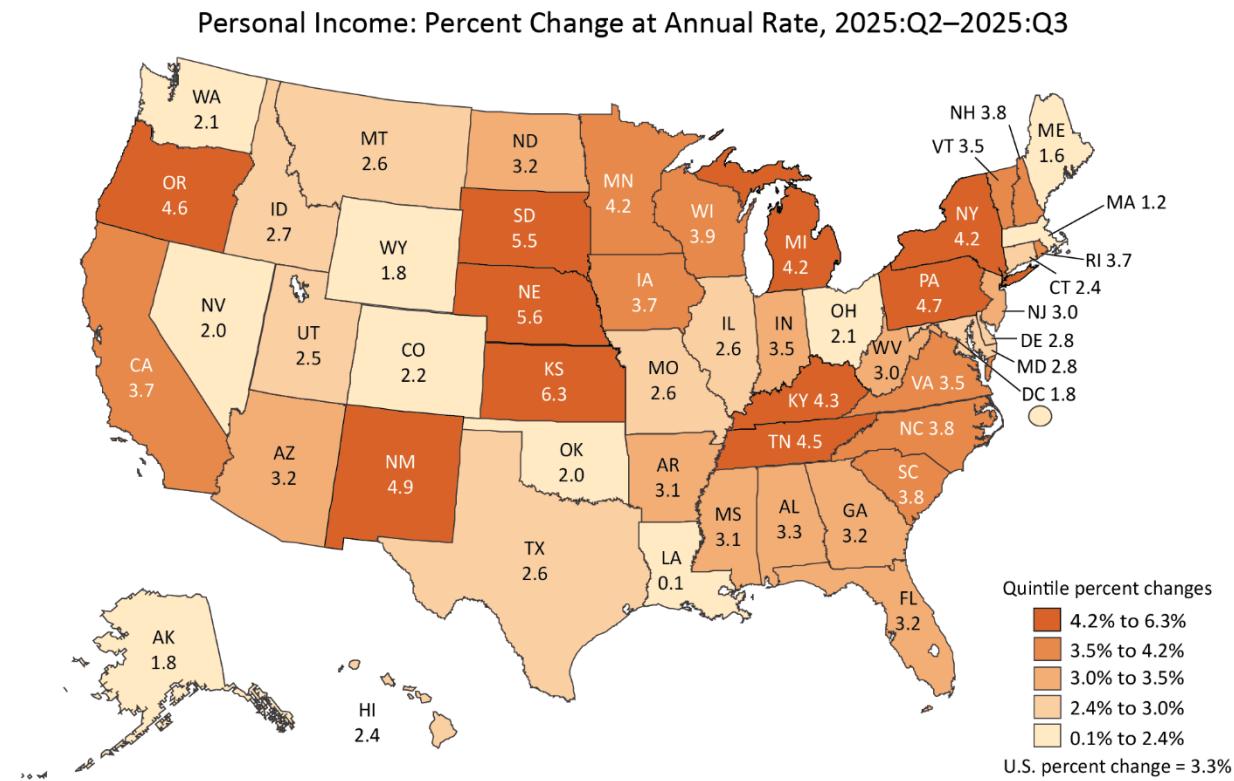

- Agriculture, forestry, fishing, and hunting increased in 34 states and was the leading contributor to growth in Kansas and South Dakota, the states with the first- and second-largest increases in real GDP, respectively.
- Durable-goods manufacturing increased in all 50 states and the District of Columbia and was the leading contributor to growth in 13 states including Arkansas and Connecticut, the states with the third- and fourth-largest increases in real GDP, respectively.

Current-dollar GDP increased in all 50 states and the District of Columbia. Current-dollar GDP increased at an annual rate of 8.3 percent nationally and ranged from 10.5 percent in Kansas to 2.6 percent in North Dakota.

Personal income highlights

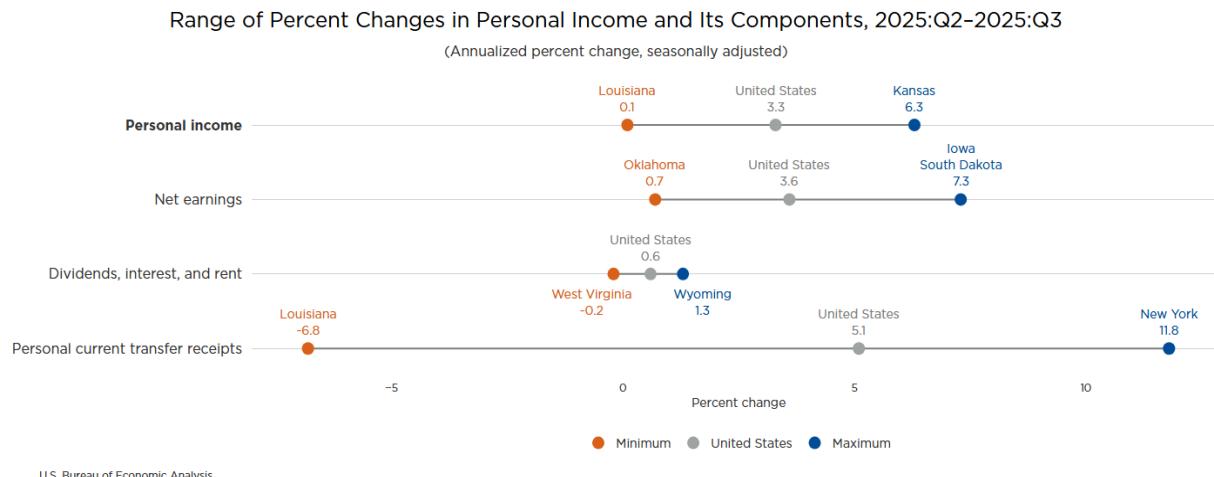

Personal income increased in all 50 states and the District of Columbia in the third quarter of 2025. [Current-dollar personal income increased at an annual rate](#) of 3.3 percent and ranged from 6.3 percent in Kansas to 0.1 percent in Louisiana.

U.S. Bureau of Economic Analysis

In the third quarter of 2025, all [components of personal income](#)—earnings, transfer receipts, and property income (dividends, interest, and rent)—contributed to the increase in personal income nationally. Earnings increased in all 50 states and the District of Columbia.

- **Earnings** increased 3.6 percent nationally, ranging from 7.3 percent in Iowa and South Dakota to 0.7 percent in Oklahoma. Earnings was the largest contributor to growth in personal income in 46 states and the District of Columbia.
- **Transfer receipts** increased 5.1 percent nationally, with state-level changes in transfer receipts ranging from an 11.8 percent increase in New York to a 6.8 percent decrease in Louisiana. The increase in transfer receipts was due to increases in Medicaid payments and Medicare benefits, while Social Security payments offset the increase.
- **Property income** increased 0.6 percent nationally, with state-level changes in property income ranging from a 1.3 percent increase in Wyoming to a 0.2 percent decrease in West Virginia.

Update of state statistics

Today, BEA also released revised quarterly estimates of personal income by state for the first and second quarters of 2025. This update incorporates new and revised source data that are more complete and more detailed than previously available and aligns the states with the national estimates from the National Income and Product Accounts released on January 22, 2026.

BEA also released new estimates of per capita personal income for the third quarter of 2025, along with revised estimates for the first quarter of 2025 through the second quarter of 2025. BEA used U.S. Census Bureau population figures to calculate per capita personal income estimates.

New combined national and state news release

Starting April 9, 2026, BEA will begin to release national and state estimates together at the same time. During every third estimate release of U.S. GDP, BEA will release GDP, GDP by industry, and corporate profits along with state estimates of GDP and personal income. This combined release will provide a fuller picture of the economies of the nation, all states, and the District of Columbia and will replace the publication of two separate releases issued on different days.

Recent changes in the presentation of tables

Data previously published as tables within the quarterly news releases of GDP and personal income are updated and available simultaneously with today's release in BEA's online [Interactive Data Application](#). Tables are no longer included with the body of the news release. This reduces duplication, increases efficiency, and points data users directly to BEA's most complete and flexible data tables, via links in the release. These customizable tables include full time series and can be downloaded as PDFs, in Excel, or in CSV format.

Related Interactive Data Tables

For the third-quarter 2025 GDP and personal income by state statistics highlighted in this release, as well as historical time series for these estimates, see the below data tables in [BEA's Interactive Data Application](#).
