# U.S. INTERNATIONAL TRADE IN GOODS AND SERVICES March 2014

#### **Goods and Services**

The U.S. Census Bureau and the U.S. Bureau of Economic Analysis, through the Department of Commerce, announced today that total March exports of \$193.9 billion and imports of \$234.3 billion resulted in a goods and services deficit of \$40.4 billion, down from \$41.9 billion in February, revised. March exports were \$3.9 billion more than February exports of \$190.0 billion. March imports were \$2.5 billion more than February imports of \$231.8 billion.

In March, the goods deficit decreased \$0.6 billion from February to \$60.7 billion, and the services surplus increased \$0.9 billion from February to \$20.4 billion. Exports of goods increased \$3.7 billion to \$135.1 billion, and imports of goods increased \$3.1 billion to \$195.8 billion. Exports of services increased \$0.2 billion to \$58.8 billion, and imports of services decreased \$0.7 billion to \$38.4 billion.

The goods and services deficit increased \$3.8 billion from March 2013 to March 2014. Exports were up \$9.2 billion, or 5.0 percent, and imports were up \$13.0 billion, or 5.9 percent.

#### **Goods (Census Basis)**

The February to March increase in exports of goods reflected increases in *capital goods* (\$2.1 billion); *industrial supplies and materials* (\$0.9 billion); *automotive vehicles, parts, and engines* (\$0.6 billion); *other goods* (\$0.3 billion); and *foods, feeds, and beverages* (\$0.1 billion). A decrease occurred in *consumer goods* (\$0.3 billion).

The February to March increase in imports of goods reflected increases in *consumer goods* (\$1.2 billion); *foods*, *feeds*, *and beverages* (\$1.0 billion); *capital goods* (\$0.9 billion); and *other goods* (\$0.8 billion). A decrease occurred in *industrial supplies and materials* (\$0.5 billion). *Automotive vehicles*, *parts*, *and engines* were virtually unchanged.

The March 2013 to March 2014 increase in exports of goods reflected increases in *capital goods* (\$2.8 billion); *consumer goods* (\$1.5 billion); *foods, feeds, and beverages* (\$1.5 billion); and *automotive vehicles, parts, and engines* (\$0.6 billion). Decreases occurred in *industrial supplies and materials* (\$0.6 billion) and *other goods* (\$0.2 billion).

NOTE: Total goods data are reported on a balance of payments basis unless otherwise specified. Commodity and country data for goods are on a Census basis. Monthly statistics are seasonally adjusted unless otherwise specified. For information on data sources and definitions, see the information section on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm. The next FT-900 release is June 4, 2014.

The March 2013 to March 2014 increase in imports of goods reflected increases in *consumer goods* (\$4.1 billion); *capital goods* (\$3.2 billion); *automotive vehicles, parts, and engines* (\$1.6 billion); *foods, feeds, and beverages* (\$1.0 billion); *industrial supplies and materials* (\$0.8 billion); and *other goods* (\$0.1 billion).

#### **Services**

Exports of services increased \$0.2 billion from February to March. Increases in *other private services* (\$0.2 billion), which includes items such as business, professional, and technical services, insurance services, and financial services, and in *passenger fares* (\$0.1 billion) were partly offset by a decrease in *travel* (\$0.1 billion). Changes in the other categories of services exports were relatively small.

Imports of services decreased \$0.7 billion from February to March. The decrease was more than accounted for by a decrease in *royalties and license fees* (\$0.7 billion), which in February included payments for the rights to broadcast the 2014 Winter Olympic Games. Decreases in *travel* (\$0.1 billion) and in *passenger fares* (\$0.1 billion) also contributed. Partly offsetting these decreases were increases in *other transportation* (\$0.2 billion), which includes freight and port services, and in *other private services* (\$0.1 billion). Changes in the other categories of services imports were relatively small.

The March 2013 to March 2014 increase in exports of services was \$3.3 billion or 6.0 percent. The largest increases were in *other private services* (\$2.0 billion), in *travel* (\$0.7 billion), and in *royalties and license fees* (\$0.6 billion). Within *other private services*, the largest increase was in business, professional, and technical services.

The March 2013 to March 2014 increase in imports of services was \$1.8 billion or 4.8 percent. The largest increases were in *other private services* (\$1.5 billion) and in *other transportation* (\$0.2 billion). Within *other private services*, the largest increase was in business, professional, and technical services.

#### **Goods and Services Moving Average**

For the three months ending in March, exports of goods and services averaged \$192.1 billion, while imports of goods and services averaged \$232.6 billion, resulting in an average trade deficit of \$40.5 billion. For the three months ending in February, the average trade deficit was \$40.0 billion, reflecting average exports of \$191.2 billion and average imports of \$231.3 billion.

#### **Selected Not Seasonally Adjusted Goods Details**

The March figures show surpluses, in billions of dollars, with Hong Kong \$2.4 (\$2.9 for February), Brazil \$1.8 (\$1.2), Australia \$1.3 (\$1.4), and Singapore \$1.3 (\$1.3). Deficits were recorded, in billions of dollars, with China \$20.4 (\$20.9), European Union \$11.5 (\$9.1), Japan \$5.9 (\$5.3), Germany \$5.9 (\$4.5), OPEC \$5.2 (\$5.7), Mexico \$5.1 (\$4.0), Saudi Arabia \$3.3 (\$3.2), Canada \$2.2 (\$2.1), India \$2.2 (\$1.7), Venezuela \$1.8 (\$1.8), Ireland \$1.8 (\$1.9), and South Korea \$1.3 (\$1.0).

Advanced technology products exports were \$29.3 billion in March and imports were \$33.2 billion, resulting in a deficit of \$3.9 billion. March exports were \$5.0 billion more than the \$24.3 billion in February, while March imports were \$5.6 billion more than the \$27.6 billion in February.

#### **Revisions**

#### Census Basis (not seasonally adjusted)

For February, exports of goods were revised down \$0.2 billion, and imports of goods were revised down \$0.6 billion. Goods carry-over in March was \$0.1 billion (0.1 percent) for exports and \$1.1 billion (0.5 percent) for imports. For February, revised export carry-over was \$0.1 billion (0.1 percent), while revised import carry-over was \$0.3 billion (0.2 percent).

#### **Balance of Payments Basis (seasonally adjusted)**

For February, exports of goods were revised down \$0.3 billion, and imports of goods were revised down \$0.7 billion.

For February, exports of services were revised down \$0.1 billion, mainly reflecting a downward revision in *travel*. For February, imports of services were revised down \$0.2 billion, mainly reflecting a downward revision in *travel*.

#### **NOTICE**

#### **Seasonally Adjusted Countries and Areas for Goods and Services**

With the release of April 2014 statistics on June 4, 2014, the "U.S. International Trade in Goods and Services" report will include a new exhibit (Exhibit 20) that presents quarterly seasonally adjusted trade in goods and services on a balance of payments basis for selected major trading partner countries and areas. A template of this exhibit is available at <a href="https://www.bea.gov/newsreleases/international/trade/2014/xls/trad0214\_exhibit20.xls">www.bea.gov/newsreleases/international/trade/2014/xls/trad0214\_exhibit20.xls</a>.

# <u>Upcoming Revisions to Goods and Services and Comprehensive Restructuring of the International Economic Accounts</u>

On June 4, 2014, the U.S. Census Bureau and the U.S. Bureau of Economic Analysis (BEA) will release "U.S. International Trade in Goods and Services: April 2014" and "U.S. International Trade in Goods and Services: Annual Revision for 2013." With these releases, statistics on trade in goods on a Census basis will be revised beginning with 2011, and statistics on trade in goods on a balance of payments (BOP) basis and on trade in services will be revised beginning with 1999. The revised statistics on trade in goods on a Census basis will reflect corrections and adjustments to previously published not seasonally adjusted statistics, minor reclassifications of commodities to end-use categories, and recalculated seasonal and trading-day adjustments. The revised statistics on trade in goods on a BOP basis and on trade in services will reflect newly available and revised source data, changes in estimation methods, and changes in definitions and classifications. The revised statistics will also be included in the report "U.S. International Transactions: First Quarter 2014 and Annual Revisions" and in the annual revision of the U.S. International Transactions Accounts (ITAs), both to be released by BEA on June 18, 2014.

With this year's annual revision, BEA will also introduce a new presentation of the ITAs, including a new presentation of services, as part of a comprehensive restructuring of BEA's international economic accounts. This change in presentation, combined with the changes in definitions and classifications, will bring the statistics into closer alignment with international guidelines. <u>Table templates</u> of the new presentation are available on BEA's Web site. Additional information on BEA's comprehensive restructuring of the international accounts was presented in the <u>March 2014 Survey of Current Business</u>. Changes that will impact the "U.S. International Trade in Goods and Services" release are discussed below.

#### Goods on a BOP Basis

Net exports of goods under merchanting, which are currently included in trade in services under *other private services*, will be reclassified to goods through a new BOP adjustment. These net exports reflect the net value of goods that are purchased and subsequently sold abroad without entering the United States. Because these goods do not cross the U.S. customs frontier, their value is not recorded in the data for goods on a Census basis. BOP adjustments—adjustments that BEA applies to goods on a Census basis to convert them to a BOP basis—are combined and presented as *net adjustments* in this release.

#### Services

The services categories shown in Exhibits 3 and 4 will change, and the number of categories will increase from seven to nine. The new categories will be: *maintenance and repair services n.i.e.* (not included elsewhere); *transport*; *travel* (*for all purposes including education*); *insurance services*; *financial services*; *charges for the use of intellectual property n.i.e.*; *telecommunications, computer, and information services*; *other business services*; and *government goods and services n.i.e.* Templates of the new presentation for Exhibits 3 and 4 are available at www.bea.gov/newsreleases/international/trade/2014/xls/trad0114\_prototype.xls.

The current category *other transportation* will be renamed *transport* and will include *passenger fares*, which will no longer be shown as a separate category. *Royalties and license fees* will be renamed *charges for the use of intellectual property n.i.e. Transfers under U.S. military agency sales contracts* (for exports), *direct defense* 

expenditures (for imports), and <i>U.S. government miscellaneous services</i> (for exports and imports) will be part of government goods and services n.i.e. The definition of travel will be broadened to include health-rand education-related travel and the expenditures on goods and services by border, seasonal, and other sh workers, all of which are currently included in <i>other private services</i> . To distinguish it from the current measure will be called <i>travel</i> (for all purposes including education). Maintenance and repair services, financial services, and insurance services, all of which are currently included in <i>other private services</i> be shown as separate categories. Other business services will consist of the remaining components of other private services.	related ort-term neasure, vices ces, will

<sup>(1)</sup> Data are presented on a BOP basis.

#### NOTES

<sup>\*</sup> The three-month moving averages shown in this exhibit are computed by summing the subject month and the two prior months, dividing by three, and showing the average at the end month of the period. A moving average is useful in smoothing the volatile trade data so that trends can better be discerned.

<sup>\*</sup> For information on data sources and methodology, see the information section on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.

<sup>(1)</sup> Detailed data are presented on a Census basis, The information needed to convert to a BOP basis is not available.

<sup>(2)</sup> Includes petroleum and petroleum products.

NOTE: For information on data sources, nonsampling errors and definitions, see the information section on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.

#### **Exhibit 7. Exports of Goods by End-Use Category and Commodity**

In millions of dollars. Details may not equal totals due to seasonal adjustment and rounding. The commodities in this exhibit are ranked on the monthly change within each major commodity grouping. (-) Represents zero or less than one-half of measurement shown. (R) - Revised.

<sup>(1)</sup> The petroleum products aggregated in the end-use commodity classification system include virtually the same energy-related petroleum products as those aggregated in the Standard International Trade Classification (SITC). The end-use petroleum products, however, include some products such as ethane, butane, benzene, and toluene, which are included in "Manufactured Goods" in the SITC.

NOTE: For information on data sources, nonsampling errors, definitions and details concerning what is included in the Net Adjustments, see the information section on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.

#### Exhibit 10. Real Exports and Imports of Goods by Principal End-Use Category Chained (2009) Dollars

In millions of dollars. Details may not equal totals due to seasonal adjustment and rounding. The values in this exhibit are subject to periodic change, reflecting revisions to the source information for the monthly deflators. (-) Represents zero or less than one-half of measurement shown. (R) - Revised.

<sup>(1)</sup> Detailed data are presented on a Census basis. The information needed to convert to a BOP basis is not available.

NOTE: For information on data sources, nonsampling errors and definitions, see the information section on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.

<sup>(2)</sup> The "residual" represents the difference between total Census Basis exports or imports and the sum of the components. For additional information, see www.census.gov/foreign-trade/aip/priceadj.html.

<sup>(1)</sup> Detailed data are presented for domestic exports unless otherwise noted. All data are on a Census basis. The information needed to convert to a BOP basis is not available.

NOTE: For information on data sources, nonsampling errors and definitions, see the information section on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.

<sup>(2)</sup> Total exports including re-exports (exports of foreign merchandise).

<sup>(3)</sup> Manufactured Goods is based on the North American Industry Classification System (NAICS) and Agricultural Commodities is based on the Harmonized System commodities specified by the U.S. Department of Agriculture definition. All other commodity detail is based on the SITC.

<sup>(4)</sup> Due to non-disclosure requirements, certain 10-digit Schedule B commodity classifications are subject to suppression and require a change in aggregation. For additional information, see www.census.gov/foreign-trade/statistics/notices/aircraft.

#### NOTES:

<sup>\*</sup> Due to non-disclosure requirements, certain 10-digit Schedule B commodity classifications are subject to suppression and require a change in aggregation. As a result, Advanced Technology Product exports are overstated by \$526 million in March 2014. For additional information, see www.census.gov/ft900.

<sup>\*</sup> Data are not available on a BOP basis. For information on data sources, nonsampling errors and definitions, see the information section on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.

#### NOTES

- \* Data are not available on a BOP basis.
- \* Countries may be included in more than one area. For a list of countries in each area, see the information section on page A-2 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.
- \* Area data reflect the composition of the areas as they were as of the most recent statistical period.
- \* Seasonally adjusted country and area data in this exhibit will not sum to the commodity-based seasonally adjusted totals shown in Part A of this release. Data users should use caution drawing comparisons between the two sets of seasonally adjusted series.
- \* For information on data sources, nonsampling errors and definitions, see the information section on page A-1 of this release or at www.census.gov/ft900 or www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.

#### INFORMATION ON GOODS AND SERVICES

#### GOODS (CENSUS BASIS)

Data for goods on a Census basis are compiled from the documents collected by the U.S. Customs and Border Protection and reflect the movement of goods between foreign countries and the 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, and U.S. Foreign Trade Zones. They include government and non-government shipments of goods and exclude shipments between the United States and its territories and possessions; transactions with U.S. military, diplomatic, and consular installations abroad; U.S. goods returned to the United States by its Armed Forces; personal and household effects of travelers; and in-transit shipments. The General Imports value reflects the total arrival of merchandise from foreign countries that immediately enters consumption channels, warehouses, or Foreign Trade Zones.

For imports, the value reported is the U.S. Customs and Border Protection appraised value of merchandise—generally, the price paid for merchandise for export to the United States. Import duties, freight, insurance, and other charges incurred in bringing merchandise to the United States are excluded.

Exports are valued at the f.a.s. (free alongside ship) value of merchandise at the U.S. port of export, based on the transaction price including inland freight, insurance, and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation.

Revision policy for goods on a Census basis: Monthly data include actual month's transactions as well as a small number of transactions for previous months. Each month, the U.S. Census Bureau revises the aggregate seasonally adjusted (current and real chained-dollar) and unadjusted export, import, and trade balance figures, as well as the end-use totals for the prior month. For December and January statistical month releases, each prior month of the most recent full year is revised in order to align the seasonally adjusted monthly data with annual totals. Country detail data and commodity detail data, based on the Standard International Trade Classification (SITC) Revision 4 and the North American Industry Classification System (NAICS), are not revised monthly. The timing adjustment shown in Exhibit 14 is the difference between monthly data as originally reported and as recompiled. In addition, for March, June, September, and December statistical month releases, revisions are made to the real chained-dollar series presented in Exhibits 10 and 11: the previous five months are revised to incorporate the Bureau of Labor Statistics' revisions to price indexes, which are used to produce the real chained-dollar series and to align Census data with data published by the U.S. Bureau of Economic Analysis (BEA) in the National Income and Product Accounts (NIPAs). Annual revisions for the months are made in June to reflect corrections received subsequent to the monthly revisions. These revisions are reflected in totals, end-use, commodity, and country summary data. The monthly end-use, commodity, and country and area data presented in Exhibits 6-18 in this release are on a Census basis.

## U.S./CANADA DATA EXCHANGE AND SUBSTITUTION

Data for U.S. exports to Canada are derived from import data compiled by Canada. The use of Canada's import data to produce U.S. export data requires several alignments in order to compare the two series.

- Coverage Canadian imports are based on country of origin. U.S. goods shipped from a third country are included. U.S. exports exclude these foreign shipments. For March 2014, these shipments totaled \$193.2 million. U.S. export coverage also excludes U.S. postal shipments to Canada. For March 2014, these shipments totaled \$21.3 million.
  - U.S. import coverage includes shipments of railcars and locomotives from Canada. Effective with January 2004 statistics, Canada excludes these shipments from its goods exports to the United States, therefore creating coverage differences between the two countries for these goods.
- 2. Valuation Canadian imports are valued at the point of origin in the United States. However, U.S. exports are valued at the port of exit in the United States and include inland freight charges, making the U.S. export value slightly larger than the Canadian import value. Canada requires inland freight to be reported separately from the value of the goods. Combining the inland freight and the Canadian reported import value provides a consistent valuation for all U.S. exports. Inland freight charges for March 2014 accounted for 2.2 percent of the value of U.S. exports to Canada.
- 3. Reexports Unlike Canadian imports, which are based on country of origin, U.S. exports include reexports of foreign goods. Therefore, the aggregate U.S. export figure is slightly larger than the Canadian import figure. For March 2014, reexports to Canada were \$4,329.8 million.
- 4. Exchange Rate Average monthly exchange rates are applied to convert the published data to U.S. currency. For March 2014, the average exchange rate was 1.1107 Canadian dollars per U.S. dollar.
- 5. *Other* There are other minor differences, which are statistically insignificant, such as rounding error.

Canadian Estimates: Effective with January 2001 statistics, the current month data for exports to Canada contain an estimate for late arrivals and corrections. The following month, this estimate is replaced, in the news release exhibits only, with the actual value of late receipts and corrections. This estimate improves the current month data for exports to Canada and treats late receipts for exports to Canada in a manner that is more consistent with the treatment of late receipts for exports to other countries.

#### NONSAMPLING ERRORS

The goods data are a complete enumeration of documents collected by the U.S. Customs and Border Protection and are not subject to sampling errors. Quality assurance procedures are performed at every stage of collection, processing, and tabulation. However, the data are still subject to several types of nonsampling errors. The most significant of these include reporting errors, undocumented shipments, timeliness, data capture errors, and errors in the estimation of low-valued transactions.

**Reporting Errors**: Reporting errors are mistakes or omissions made by importers, exporters, or their agents in their import or export declarations. Most errors involve missing or invalid commodity classification codes and missing or incorrect quantities or shipping weights. They have a negligible effect on aggregate import, export, and balance of trade statistics. However, they can affect the detailed commodity statistics.

**Undocumented Shipments**: Federal regulations require importers, exporters, or their agents to report all merchandise shipments above established exemption levels. The U.S. Census Bureau has determined that not all required documents are filed, particularly for exports.

**Timeliness and Data Capture Errors**: The U.S. Census Bureau captures import and export information from administrative documents and through various automated collection programs. Documents may be lost, and data may be incorrectly keyed, coded, or recorded. Transactions may be included in a subsequent month's statistics if received late.

**Low-valued Transactions**: The total values of transactions valued as much as or below \$2,500 for exports and \$2,000 (\$250 for certain quota items) for imports are estimated for each country, using factors based on the ratios of low-valued shipments to individual country totals for past periods.

The U.S. Census Bureau recommends that data users incorporate this information into their analyses, as nonsampling errors could impact the conclusion drawn from the results. For a detailed discussion of errors affecting the goods data, see "U.S. Merchandise Trade Statistics: A Quality Profile" available at <a href="https://www.census.gov/foreign-trade/aip/index.html#infopapers">www.census.gov/foreign-trade/aip/index.html#infopapers</a> or from the Foreign Trade Division, U.S. Census Bureau.

#### AREA GROUPINGS

North America: Canada, Mexico.

**Dominican Republic-Central America-United States Free Trade Agreement (CAFTA-DR):** Costa Rica, Dominican Republic, El Salvador, Guatemala, Honduras, Nicaragua.

**Europe**: Albania, Andorra, Armenia, Austria, Azerbaijan, Belarus, Belgium, Bosnia and Herzegovina, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Faroe Islands, Finland, France, Georgia, Germany, Gibraltar, Greece, Hungary,

Iceland, Ireland, Italy, Kazakhstan, Kosovo, Kyrgyzstan, Latvia, Liechtenstein, Lithuania, Luxembourg, Macedonia, Malta, Moldova, Monaco, Montenegro, Netherlands, Norway, Poland, Portugal, Romania, Russia, San Marino, Serbia, Slovakia, Slovenia, Spain, Svalbard-Jan Mayen Island, Sweden, Switzerland, Tajikistan, Turkey, Turkmenistan, Ukraine, United Kingdom, Uzbekistan, Vatican City.

**European Union**: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, United Kingdom.

**Euro Area**: Austria, Belgium, Cyprus, Estonia, Finland, France, Germany, Greece, Ireland, Italy, Latvia, Luxembourg, Malta, Netherlands, Portugal, Slovakia, Slovenia, Spain.

**Newly Industrialized Countries (NICs)**: Hong Kong, Korea (South), Singapore, Taiwan.

**Pacific Rim**: Australia, Brunei, China, Hong Kong, Indonesia, Japan, Korea (South), Macau, Malaysia, New Zealand, Papua New Guinea, Philippines, Singapore, Taiwan.

South/Central America: Anguilla, Antigua and Barbuda, Argentina, Aruba, Bahamas, Barbados, Belize, Bermuda, Bolivia, Brazil, British Virgin Islands, Cayman Islands, Chile, Colombia, Costa Rica, Cuba, Curacao, Dominica, Dominican Republic, Ecuador, El Salvador, Falkland Islands (Islas Malvinas), French Guiana, Grenada, Guadeloupe, Guatemala, Guyana, Haiti, Honduras, Jamaica, Martinique, Montserrat, Netherlands Antilles, Nicaragua, Panama, Paraguay, Peru, Sint Maarten, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Suriname, Trinidad and Tobago, Turks and Caicos Islands, Uruguay, Venezuela.

**OPEC**: Algeria, Angola, Ecuador, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, United Arab Emirates, Venezuela.

Africa: Algeria, Angola, Benin, Botswana, British Indian Ocean Territories, Burkina Faso, Burundi, Cameroon, Cape Verde, Central African Republic, Chad, Comoros, Congo (Brazzaville), Congo (Kinshasa), Djibouti, Egypt, Equatorial Guinea, Eritrea, Ethiopia, French Southern and Antarctic Lands, Gabon, Gambia, Ghana, Guinea, Guinea-Bissau, Ivory Coast, Kenya, Lesotho, Liberia, Libya, Madagascar, Malawi, Mali, Mauritania, Mauritius, Mayotte, Morocco, Mozambique, Namibia, Niger, Nigeria, Reunion, Rwanda, St. Helena, Sao Tome and Principe, Senegal, Seychelles, Sierra Leone, Somalia, South Africa, South Sudan, Sudan, Swaziland, Tanzania, Togo, Tunisia, Uganda, Western Sahara, Zambia, Zimbabwe.

### ADJUSTMENTS FOR SEASONAL AND TRADING-DAY VARIATIONS

Goods are initially classified under the Harmonized Commodity Description and Coding System (Harmonized System), which describes and measures the characteristics of goods traded. Combining trade into approximately 140 export and 140 import end-use categories makes it possible to examine goods according to their principal uses (see Exhibits 7 and 8). These categories are used as the basis for computing the seasonal and trading-day adjusted data. These adjusted data are then summed to the six end-use aggregates for publication (see Exhibit 6). These data are provided to BEA, from the U.S. Census Bureau, for use in the NIPAs and in the U.S International Transactions Accounts (balance of payments accounts).

Exhibit 19 shows goods (Census Basis) that are seasonally adjusted for selected countries and world areas. Unlike the commodity-based adjustments discussed above, these adjustments are developed and applied directly at the country and world area levels. For total exports and imports, data users should refer to the commodity-based totals shown in the other exhibits. The seasonally adjusted country and world area data will not sum to the seasonally adjusted commodity-based totals because the seasonally adjusted country and world area data and the commodity-based totals are derived from different aggregations of the export and import data and from different seasonal adjustment models. Data users should use caution drawing comparisons between the two sets of series.

The seasonal adjustment procedure (X13-ARIMA-SEATS) is based on a model that estimates the monthly movements as percentages above or below the general level of series (unlike other methods that redistribute the actual series values over the calendar year). Because the data series for aircraft is highly variable, users studying data trends may wish to analyze aircraft separately from other trade.

#### ADJUSTMENTS FOR PRICE CHANGE

Data adjusted for seasonal variation on a chained-dollar basis (2009 base year) are presented in Exhibits 10 and 11. This adjustment for price change is done using the Fisher chain-weighted methodology. The deflators are primarily based upon the monthly price indexes published by the Bureau of Labor Statistics using techniques developed for the NIPAs by BEA.

#### PRINCIPAL COMMODITIES

Goods data appearing in Exhibit 15 are classified in terms of the SITC Revision 4, with the exception of agricultural and manufactured goods. Agricultural goods are defined by the U.S. Department of Agriculture (USDA); they consist of non-marine food products and other products of agriculture that have not passed through complex processes of manufacture. Manufactured goods conform to the NAICS; they consist of goods that have been mechanically, physically, or chemically transformed. USDA agricultural goods and NAICS manufactured goods are not mutually exclusive categories.

Reexports are foreign merchandise entering the country as imports and then exported in substantially the same condition as

when imported. Reexports, included in overall export totals, appear as separate line items in Exhibit 15.

#### ADVANCED TECHNOLOGY PRODUCTS

About 500 of some 22,000 Harmonized System classification codes used in reporting U.S. merchandise trade are identified as "advanced technology" codes, and they meet the following criteria:

- 1. The code contains products whose technology is from a recognized high technology field (e.g., biotechnology).
- 2. These products represent leading edge technology in that field.
- 3. Such products constitute a significant part of all items covered in the selected classification code.

The aggregation of the goods results in a measure of advanced technology trade that appears in Exhibits 16 and 16a. This product- and commodity-based measure of advanced technology differs from broader NAICS-based measures, which include all goods produced by a particular industry group, regardless of the level of technology embodied in the goods.

#### **GOODS (BALANCE OF PAYMENTS BASIS)**

Goods on a Census basis are adjusted by BEA to a balance of payments basis to align the data with the concepts and definitions used to prepare the international and national economic accounts. These adjustments, which are applied separately to exports and imports, are necessary to supplement coverage of the Census data, to eliminate duplication of transactions recorded elsewhere in the international accounts, and to value transactions at market prices. They include both additions to and deductions from goods on a Census basis and are presented in this release as "Net Adjustments." Adjustments that exhibit significant seasonal patterns are seasonally adjusted. BEA also publishes more detailed quarterly and annual statistics for Net Adjustments in a standard table of the U.S. International Transactions Accounts, Table 2. U.S. Trade in Goods. See the BEA Web site at www.bea.gov/iTable/index\_ita.cfm or the January, April, July, and October issues of the Survey of Current Business.

The export adjustments include:

**Exports under U.S. military sales contracts** - This adjustment reflects the net amount of two separate adjustments. BEA first *deducts* goods identified in the Census data as exports under the U.S. Foreign Military Sales program. BEA then *adds* primary source data for these exports, which are reported to BEA by the U.S. Department of Defense.

**Gold exports, nonmonetary -** This *addition* is made for gold that is purchased by foreign official agencies from private dealers in the United States and held at the Federal Reserve Bank of New York. The Census data only include gold that leaves the U.S. customs territory.

**Goods procured in U.S. ports by foreign carriers -** This *addition* is made for foreign air and ocean carriers' fuel purchases in U.S. ports.

**Low-value transactions -** This *addition* is made to phase in a revised Census Bureau methodology for low-value goods for statistics prior to 2010. The revised Census methodology was implemented for goods on a Census basis beginning with statistics for 2010.

Other adjustments to exports include:

Deductions for equipment repairs (parts and labor), developed motion picture film, and military grant-aid. Additions for sales of fish caught in U.S. territorial waters, exports of electricity to Mexico, private gift parcels, vessels and oil rigs for which ownership changes, and valuation of software exports at market value.

The import adjustments include:

**Gold imports, nonmonetary -** This *addition* is made for gold sold by foreign official agencies to private purchasers out of stock held at the Federal Reserve Bank of New York. The Census data only include gold that enters the U.S. customs territory.

**Goods procured in foreign ports by U.S. carriers -** This *addition* is made for U.S. air and ocean carriers' fuel purchases in foreign ports.

**Imports by U.S. military agencies -** This *addition* is made for purchases of goods abroad by U.S. military agencies, which are reported to BEA by the U.S. Department of Defense. The Census data only include imports of goods by U.S. military agencies that enter the U.S. customs territory.

Inland freight in Canada and Mexico - This addition is made for inland freight in Canada and Mexico. Imports of goods from all countries should be valued at the customs value—the value at the foreign port of export including inland freight charges. For imports from Canada and Mexico, this should be the cost of the goods at the U.S. border. However, the customs value for imports for certain Canadian and Mexican goods is the point of origin in Canada or Mexico. BEA makes an addition for the inland freight charges of transporting these goods to the U.S. border to make the value comparable to the customs value reported for imports from other countries.

**Low-value transactions -** This *addition* is made to phase in a revised Census Bureau methodology for low-value goods for statistics prior to 2010. The revised Census methodology was implemented for goods on a Census basis beginning with statistics for 2010.

Other adjustments to imports include:

*Deductions* for equipment repairs (parts and labor), repairs to U.S. vessels abroad, and developed motion picture film. *Additions* for non-reported imports of locomotives and

railcars, imports of electricity from Mexico, conversion of vessels for commercial use, and valuation of software imports at market value.

#### **SERVICES**

The services statistics cover transactions between foreign countries and the 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, and other U.S. territories and possessions. Transactions with U.S. military, diplomatic, and consular installations abroad are excluded because these installations are considered to be part of the U.S. economy.

Services statistics are based on quarterly, annual, and benchmark surveys and information obtained from monthly government and industry reports. Services are seasonally adjusted when statistically significant seasonal patterns are present. No monthly country or area detail is available due to the lack of adequate source data.

Services are shown in seven broad categories. The types of services for exports and imports are the same for six of the categories. For the seventh, the export category is *transfers under U.S. military sales contracts* and the import category is *direct defense expenditures*. The following is a brief description of the types of services included in each category:

**Travel** - Purchases of services and goods by U.S. travelers abroad and by foreign visitors to the United States. A traveler is defined as a person who stays for a period of less than one year in a country of which the person is not a resident. Includes cruise fares and expenditures for food, lodging, recreation, gifts, and other items incidental to a foreign visit.

**Passenger fares** - Fares paid by residents of one country to transportation carriers of other countries. Receipts consist of fares received by U.S. carriers from foreign residents for travel between the United States and foreign countries and between two foreign points. Payments consist of fares paid by U.S. residents to foreign carriers for travel between the United States and foreign countries. Excludes cruise fares, which are included in *travel*.

Other transportation - Transactions include freight charges for the transportation of goods to and from the United States, operating expenses that transportation companies incur in foreign ports, space transport services, postal services, and payments for vessel charter and aircraft leases with crew. Excludes air and ocean carriers' fuel purchases in foreign ports, which are included in exports and imports of goods on a balance of payments (BOP) basis.

Royalties and license fees - Transactions for the rights to use, the rights to reproduce or distribute, and the outright sale or purchase of intellectual property such as patents, techniques, processes, formulas, designs, know-how, trademarks, copyrights, franchises, and manufacturing rights. The term "royalties" generally refers to payments for the use of copyrights or trademarks; the term "license fees" generally refers to payments for the use of patents or industrial processes. Includes fees for the rights to distribute film and television recordings.

Other private services - Transactions consist of education services; financial services (includes fees and commissions and excludes investment income); insurance services; telecommunications services (includes transmission services and value-added services); business, professional, and technical services (includes advertising services; computer and data processing services; database and other information services; research, development, and testing services; management, consulting, and public relations services; legal services; construction services; architectural and engineering services; mining services; industrial engineering services; installation, maintenance, and repair of equipment; and medical services); and other services.

**Transfers under U.S. military sales contracts** (*Exports only*) - Transactions include exports of services, such as training services and repair services, provided by U.S. government military agencies through grants and the U.S. Foreign Military Sales (FMS) program. Excludes exports of goods under the FMS program, which are included in exports of goods on a BOP basis.

**Direct defense expenditures** (*Imports only*) - Transactions include expenditures by U.S. military agencies abroad, including expenditures by U.S. personnel, payments of wages to foreign residents, construction expenditures, and payments for foreign contractual services. Excludes purchases of goods abroad, which are included in imports of goods on a BOP basis.

**U.S. government miscellaneous services** - Transactions of U.S. government nonmilitary agencies with foreign residents. Most of these transactions involve the provision of services to, or purchases of services from, foreigners. Some goods transactions are also included.

Revision policy for goods on a balance of payments basis and for services: Each month, a preliminary estimate for the current month and a revised estimate for the immediately preceding month are released. After the initial revision, no further revisions are made to a month until more complete source data become available in March, June, September, and

December. The releases in these months contain revised estimates for the previous six months. The release in March also contains revisions for all months of the previous year in order to align the seasonally adjusted monthly data with annual totals. The release in June also contains annual revisions, which reflect available newly source revised data. changes in definitions

MONTHLY RELEASE SCHEDULE								
Month	Date	Day						
Jan	03-07-14	Friday						
Feb	04-03-14	Thursday						
Mar	05-06-14	Tuesday

and classifications, and changes in estimation methods. In addition, the release in February contains revisions to goods for January through November of the most recent year in order to align the seasonally adjusted monthly data with annual totals.

#### U.S. INTERNATIONAL TRANSACTIONS ACCOUNTS

Quarterly and annual estimates of goods on a balance of payments basis and of services are included in the U.S. International Transactions Accounts, which are published in news releases in March, June, September, and December and in the *Survey of Current Business* in the January, April, July, and October issues. The next release of the U.S. International Transactions Accounts is scheduled for June 18, 2014. The *Survey of Current Business* is available online at www.bea.gov/scb/index.htm.

# Exhibit 2. Origin of Movement of U. S. Exports of Goods by State by NAICS-Based Product Code Groupings, Not Seasonally Adjusted: 2014

In millions of dollars. Foreign Trade Zone (FTZ) shipments are included in the U. S. total and distributed among individual states and territories. Separate FTZ total line is for reference only. Details may not equal totals due to rounding. (X) Not applicable.

(-) Represents zero or less than one-half unit of measurement shown.
