Personal Income and Outlays: June 2019 Annual Update: January 2014 through May 2019

Personal income increased \$83.6 billion (0.4 percent) in June according to estimates released today by the Bureau of Economic Analysis. **Disposable personal income** (DPI) increased \$69.7 billion (0.4 percent) and **personal consumption expenditures** (PCE) increased \$41.0 billion (0.3 percent).

Real DPI increased 0.3 percent in June and **Real PCE** increased 0.2 percent. The **PCE price index** increased 0.1 percent. Excluding food and energy, the PCE price index increased 0.2 percent.

		2019									
	Feb.	Mar.	Apr.	May	June						
	Per	cent chan	ge from pre	eceding mo	onth						
Personal income:											
Current dollars	0.6	0.4	0.4	0.4	0.4						
Disposable personal income:											
Current dollars	0.5	0.4	0.4	0.3	0.4						
Chained (2012) dollars	0.4	0.2	0.1	0.2	0.3						
Personal consumption expenditures (PCE):											
Current dollars	-0.1	1.0	0.6	0.5	0.3						
Chained (2012) dollars	-0.2	0.8	0.3	0.3	0.2						
Price indexes:											
PCE	0.1	0.2	0.3	0.1	0.1						
PCE, excluding food and energy	0.0	0.1	0.2	0.2	0.2						
Price indexes:	Percent change from month one year ago										
PCE	1.3	1.4	1.5	1.4	1.4						
PCE, excluding food and energy	1.6	1.5	1.5	1.5	1.6						

The increase in personal income in June primarily reflected increases in wages and salaries, government social benefits to persons, and supplements to wages and salaries (table 3).

The \$21.4 billion increase in real PCE in June primarily reflected a \$19.5 billion increase in spending for nondurable goods and a \$4.6 billion increase in spending for services, that was partially offset by a decline of \$1.5 billion in spending for durable goods (table 7). Within nondurable goods, other nondurable goods (including pharmaceutical products) was the leading contributor to the increase. Within durable goods, motor vehicles and parts was the leading contributor to the decline. Detailed information on monthly real PCE spending can be found in Table 2.3.6U.

Personal outlays increased \$44.2 billion in June (table 3). **Personal saving** was \$1.34 trillion in June and the **personal saving rate**, personal saving as a percentage of disposable personal income, was 8.1 percent (table 1).

Annual Update of the National Income and Product Accounts

The estimates released today also reflect the results of the Annual Update of the National Income and Product Accounts (NIPAs). The update covers January of 2014 through May of 2019.

With today's release, most NIPA tables are available through BEA's Interactive Data application on the BEA Web site (www.bea.gov). See "Information on Updates to the National Income and Product Accounts" for the complete table release schedule and a summary of results for 2014 through 2018, which includes a discussion of methodology changes. A table showing the major current-dollar revisions and their sources for each component of GDP, national income, and personal income is also provided.

The August 2019 *Survey of Current Business* will include an article describing the update in more detail. Previously published estimates, which are superseded by today's release, are found in BEA's archives.

Updates to Personal Income and Outlays

Revisions to the personal income and outlays estimates reflect the results of the 2019 annual update of the NIPAs. Revisions to annual estimates of personal income and outlays for 2014 through 2018 are shown in table 12. Revised and previously published monthly estimates of personal income, DPI, PCE, personal saving as a percentage of DPI, real DPI, and real PCE are shown in table 13. Revised and previously published annual and quarterly estimates are shown in table 14.

Personal income was revised down \$0.1 billion, or less than -0.1 percent in 2014; revised down \$1.8 billion, or less than -0.1 percent in 2015; revised down \$4.0 billion, or less than -0.1 percent in 2016; revised up \$47.9 billion, or 0.3 percent in 2017; and revised up \$249.6 billion, or 1.4 percent in 2018.

- For 2014, revisions to personal income primarily reflected a \$3.8 billion downward revision to rental income of persons with capital consumption adjustment that was partly offset by a \$2.0 billion upward revision to wages and salaries.
- For 2015, revisions to personal income primarily reflected a \$3.7 billion downward revision to rental income of persons with capital consumption adjustment that was partly offset by a \$2.3 billion upward revision to wages and salaries.

-

- For 2016, revisions to personal income primarily reflected a \$16.5 billion upward revision to personal interest income that was more than offset by a \$13.4 billion downward revision to rental income of persons with capital consumption adjustment and a \$11.7 billion downward revision to personal dividend income.
- For 2017, revisions to personal income primarily reflected an upward revision of \$28.6 billion to
 personal interest income, a \$21.4 billion upward revision to personal dividend income, and a
 \$17.3 billion upward revision to proprietors' income with inventory valuation and capital
 consumption adjustments.
- For 2018, revisions to personal income primarily reflected an upward revision of \$86.2 billion to personal interest income, an upward revision of \$75.7 billion to personal dividend income, and an upward revision of \$67.2 billion to wages and salaries.

DPI was revised up \$1.3 billion, or less than 0.1 percent in 2014; revised down \$4.3 billion, or less than -0.1 percent in 2015; revised down \$5.8 billion, or less than -0.1 percent in 2016; revised up \$36.7 billion, or 0.2 percent in 2017; and revised up \$219.7 billion, or 1.4 percent in 2018.

Personal outlays was revised up \$0.9 billion, or less than 0.1 percent in 2014; revised down \$8.9 billion, or -0.1 percent in 2015; revised down \$16.4 billion, or -0.1 percent in 2016; revised down \$7.4 billion, or -0.1 percent in 2017; and revised up \$46.4 billion, or 0.3 percent in 2018.

The personal saving rate was revised up less than 0.1 percentage point to 7.3 in 2014, revised up less than 0.1 percentage point to 7.6 in 2015, revised up 0.1 percentage point to 6.8 in 2016, revised up 0.3 percentage point to 7.0 in 2017, and revised up 1.0 percentage point to 7.7 in 2018.

QCEW Data Included in the First Quarter of 2019

BEA's data on wages and salaries for the first quarter of 2019 were based on expedited information from state employment offices across the country. BEA acknowledges the special efforts by the Bureau of Labor Statistics with the assistance of these state employment offices in providing preliminary data from the Quarterly Census of Employment and Wages (QCEW).

Next release: August 30, 2019 at 8:30 A.M. EDT Personal Income and Outlays: July 2019

Definitions

Personal income is the income received by, or on behalf of, all persons from all sources: from participation as laborers in production, from owning a home or business, from the ownership of financial assets, and from government and business in the form of transfers. It includes income from domestic sources as well as the rest of world. It does not include realized or unrealized capital gains or losses.

Disposable personal income is the income available to persons for spending or saving. It is equal to personal income less personal current taxes.

Personal consumption expenditures (PCE) is the value of the goods and services purchased by, or on the behalf of, "persons" who reside in the United States.

Personal outlays is the sum of PCE, personal interest payments, and personal current transfer payments.

Personal saving is personal income less personal outlays and personal current taxes.

The *personal saving rate* is personal saving as a percentage of disposable personal income.

Current-dollar estimates are valued in the prices of the period when the transactions occurred—that is, at "market value." Also referred to as "nominal estimates" or as "current-price estimates."

Real values are inflation-adjusted estimates—that is, estimates that exclude the effects of price changes.

For more definitions, see the <u>Glossary: National Income and Product Accounts</u>.

Statistical conventions

Annual rates. Monthly and quarterly values are expressed at seasonally-adjusted annual rates (SAAR). Dollar changes are calculated as the difference between these SAAR values. For detail, see the FAQ "Why does BEA publish estimates at annual rates?"

Month-to-month percent changes are calculated from unrounded data and are not annualized.

Quarter-to-quarter percent changes are calculated from unrounded data and are displayed at annual rates. For detail, see the FAQ "How is average annual growth calculated?"

Quantities and prices. Quantities, or "real" volume measures, and prices are expressed as index numbers with a specified reference year equal to 100 (currently 2012). Quantity and price indexes are calculated using a Fisherchained weighted formula that incorporates weights from two adjacent periods (months for monthly data, quarters for quarterly data and annuals for annual data). For details on the calculation of quantity and price indexes, see Chapter 4: Estimating Methods in the NIPA Handbook.

Chained-dollar values are calculated by multiplying the quantity index by the current dollar value in the reference year (2012) and then dividing by 100. Percent changes calculated from real quantity indexes and chained-dollar levels are conceptually the same; any differences are due to rounding. Chained-dollar values are not additive because the relative weights for a given period differ from those of the reference year. In tables that display chained-dollar values, a "residual" line shows the difference between the sum of detailed chained-dollar series and its corresponding aggregate.

p Preliminary

Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 Social security benefits include old-age, survivors, and disability insurance benefits that are distributed from the federal old-age and survivors insurance trust fund and the disability insurance trust fund.
 Medicare benefits include hospital and supplementary medical insurance benefits that are distributed from the federal hospital insurance trust fund and the supplementary medical insurance trust fund.
 Consists of nonmortgage interest paid by households. Note that mortgage interest paid by households is an expense item in the calculation of rental income of persons.
 The current-dollar measure is deflated by the implicit price deflator for personal consumption expenditures.

^{6.} Population is the total population of the United States, including the Armed Forces overseas and the institutionalized population. The monthly estimate is the average of estimates for the first of the month and the first of the following month; the annual and quarterly estimates are averages of the monthly estimates.

^{1.} Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

^{2.} Social security benefits include old-age, survivors, and disability insurance benefits that are distributed from the federal old-age and survivors insurance trust fund and the disability insurance trust fund.

^{3.} Medicare benefits include hospital and supplementary medical insurance benefits that are distributed from the federal hospital insurance trust fund and the supplementary medical insurance trust fund.

^{4.} Consists of nonmortgage interest paid by households. Note that mortgage interest paid by households is an expense item in the calculation of rental income of persons.

^{5.} The current-dollar measure is deflated by the implicit price deflator for personal consumption expenditures.

^{6.} Population is the total population of the United States, including the Armed Forces overseas and the institutionalized population. The monthly estimate is the average of estimates for the first of the month and the first of the following month; the annual and quarterly estimates are averages of the monthly estimates.

Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 Social security benefits include old-age, survivors, and disability insurance benefits that are distributed from the federal old-age and survivors insurance trust fund and the disability insurance trust fund.
 Medicare benefits include hospital and supplementary medical insurance benefits that are distributed from the federal hospital insurance trust fund and the supplementary medical insurance trust fund.
 Consists of nonmortgage interest paid by households. Note that mortgage interest paid by households is an expense item in the calculation of rental income of persons.
 The current-dollar measure is deflated by the implicit price deflator for personal consumption expenditures.

^{1.} Food consists of food and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.

^{2.} Consists of gasoline and other energy goods and of electricity and gas services.

^{3.} Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.
